

ONE STOP SERVICES

FOR CLEANROOM & ESD CONTROL

Vol. 8 (2020)

MEC Industries has grown into one of the leading companies in the field of two major business units which are ESD control and Cleanroom industries in Korea. With the rise of high-technology industry, MEC Industries has set the fundamental goal as providing quality products in all aspects of ESD control and Cleanroom area, ultimately eliminating the cause of defect from high-end products.

Over the last two decades, MEC Industries has been aimed to supply optimized ESD control and Cleanroom products to whole of Asia, Europe, Middle East and America. Now, MEC Industries is poised to take another giant leap forward to become a global leader with advanced technologies and cooperation with vast majority of reputed companies over the world.

CLEANROOM & ESD CONTROL

SAFETY

MEDICAL & PHARMACEUTICAL

1 Fabrics & Garments

• ESD / Cleanroom Fabrics

Polstar ESD / Cleanroom Fabrics are primarily composed of high multi-filament polyester and carbon filament yarn to insure maximum protection against particle contamination and ElectroStatic Discharge (ESD).

The Polstar fabrics did not neglect to consider the salient concerns of the workers including air permeability, wearability and durability.

Advantages

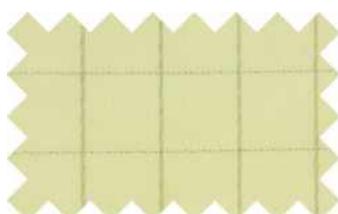

- Over 70 different fabrics
- Immediate delivery from our stock
- Strict quality control from our profound knowledge and wide experience
- Continuous development to meet customer's new requirement
- Additional treatments, such as silicon free, teflon and antimicrobial, are available.

Applications

- Electronic and semiconductor Industries
- Medical and Pharmaceutical Industries
- Food Industry
- Paint Industry
- Aerospace Industry

1 Fabrics & Garments

• ESD Coolon Fabric

Experience Innovative Cool & Enjoy More Comfortable Life!

Coolon is a powerful performance fiber with excellent moisture dispersion creating a natural and refreshing feel.

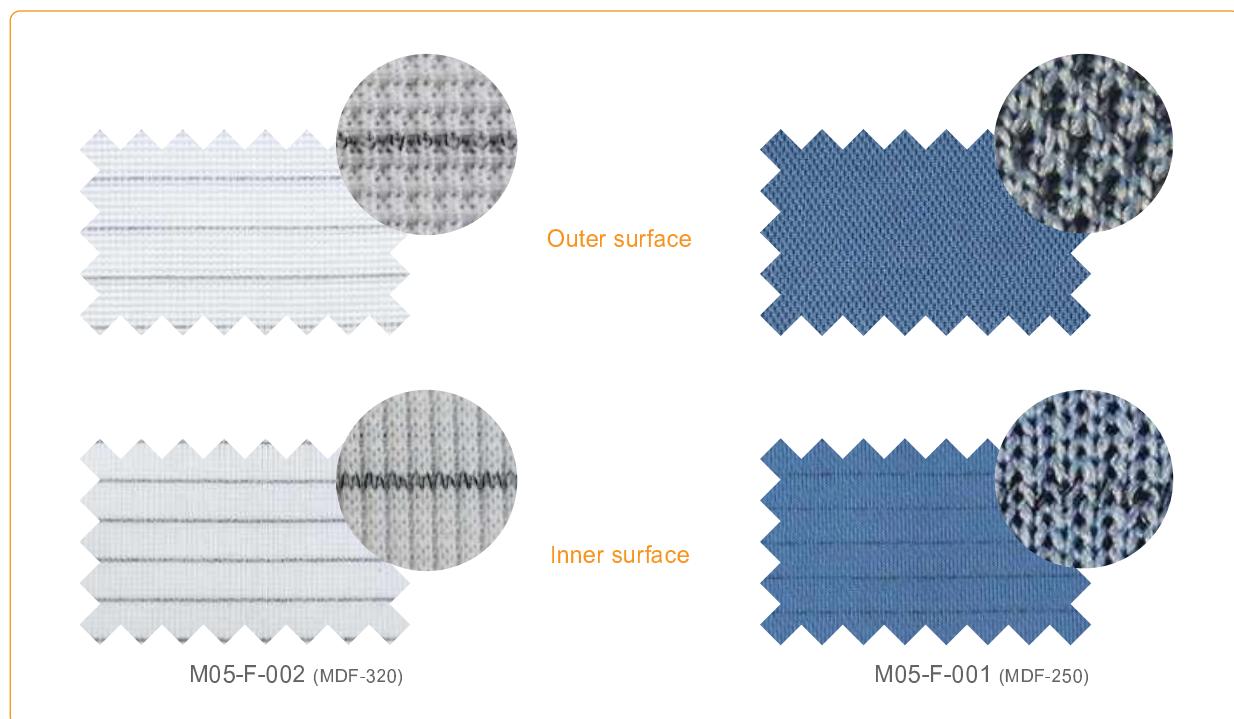

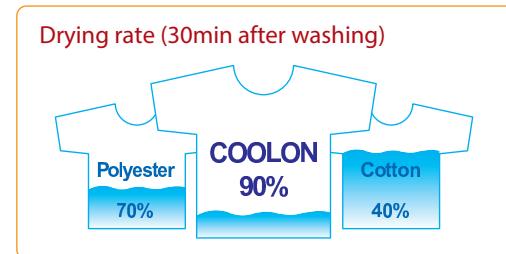

With the Cool Fiber Technology of Kolon, we have developed our own ESD Coolon Fabric with a Memory in 10mm conductive filament stripe(MDF-320) and a Pique in 7mm conductive filament stripe(MDF-250).

The Interlocking Design, also Known as Double Knitted Pattern, which is the umbrella term of Memory, Pique, etc., has different texture on both sides. The inside surface to be touched on the skin feels soft, like cotton while the surface facing outside has rough and wider in cross-section so that sweat from your skin will be evaporated and dried quickly by exposing wider surface of the fabric to the air.

Our ESD Coolon Fabric is one of the best choices for making Casual wear, Shirts and Sports wear for the people who handle any ESD sensitive materials or devices in EPA (ESD Protected Area).

Features

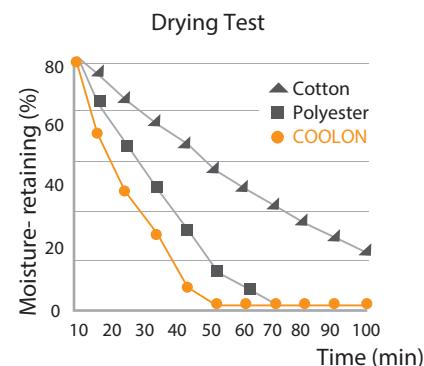

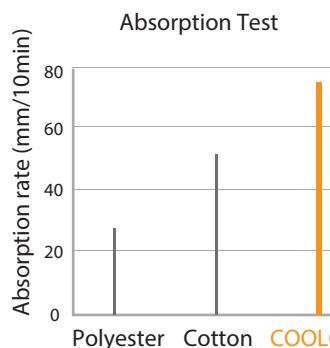

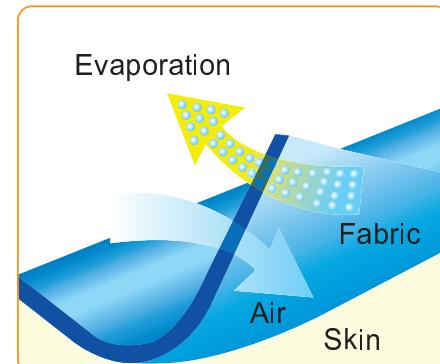

- Excellent ESD properties
- Good resistance to fading, shrinking and wrinkling.
- Improved breathability
- Quick moisture absorption
- Fast drying
- Dry and soft touch
- No particle generation
- Unique brightness
- Excellent durability
- Easy care and handling
- All-weather fabric

1 Fabrics & Garments

What is COOLON®?

The COOLON is the brand name of functional moisture-wicking fiber developed by Kolon, which is one of the leading textile companies specialized in developing various synthetic fiber in Korea. It is specially-engineered polyester fiber to improve "breathability" compared to natural fiber like cotton.

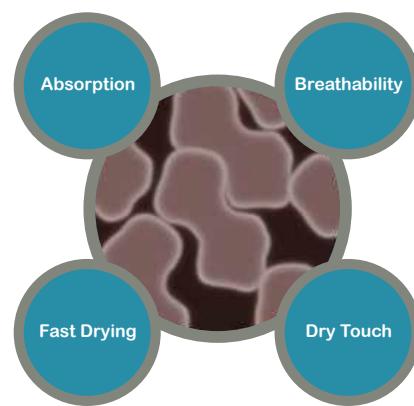

The Coolon fiber is not round, but slightly oblong in cross-section, like a peanut hull. It means that the surface of Coolon fiber in cross-section is wider than that of other fibers. This unique shape of the fiber creates capillary action that absorbs moisture through the core and out to the wider area on the surface of the fiber that increases evaporation.

M05-F-002 (MDF-250)

M05-F-002 (MDF-320)

The Cross-Section of Coolon Fiber

	MDF-250	MDF-320
Dimension	70"/72"	58"/60"
Weight(g/sqmt)	148	205
Compositions	Polyester (Coolon) 98%, Conductive Yarn 2%	
Surface Resistivity	10e6 - 10e7	1.3 x 10e6

1 Fabrics & Garments

• ESD Chemical Resistant Fabric

ESD Chemical Resistant Fabric(ECRF) is ideal for Cleanroom environment, especially where chemical related products are used and handled. There is special PU coating on ESD Cleanroom fabric, and we laminate thin chemical-proof film on the top of the coating to achieve maximum chemical resistant properties. The ECRF can protect people from any potential risks who are exposed in dangerous and harmful chemicals and will also provide you with particle and ESD safe working circumstances at the same time.

We can make several finished products with ECRF, such as ESD Arm Sleeves, ESD Apron, ESD Open-back Coat, etc.

• CSM Rubber Sheet

(Chloro sulfonated polyethylene)

- Polyester fabric (Front)
- Rubber sheet (Back)

Descriptions

- Polyester fabric reinforced with rubber sheet

Specifications

- Chloro sulfonated polyethylene rubber - 518 grs/m²
- (Re: HYPALON®)
- Polyester fabric - 248 grs/m²
- Width - 56"
- Weight per liner - 1,000 grs/yd
- Thickness - 0.80±0.05 mm

Features

- Chemical resistant properties
- Anti-slip
- Low temperature bend (-45°F)
- Strong resistance to abrasion
- Autoclavable (withstand up to 120°C)
- Gamma-rad stable at min. 737kGy - max. 760.8kGy (certified by STERIS AST)
- Antistatic finish

1 Fabrics & Garments

● Cleanroom/ESD Garment

Cleanroom/ESD Garment is used in the place where proper protection against particle contamination and ElectroStatic Discharge is required. We can supply you with this garment as well as the fabric.

We have various styles of garments such as Coverall, Gown, Lab Coat, T-shirt, etc. in our range. requirement.

Features

- Produced on your required design and fabric
- Produced by skilled workers with wide experience
- Produced with high quality fabric and sewing accessories
- Considering air permeability, comfortability, wearability and durability
- Strict quality control from fabric to finished garment
- Small quantity also can be supplied

ESD Coolon Shirts

M06-F-001 (MDF-250CS)

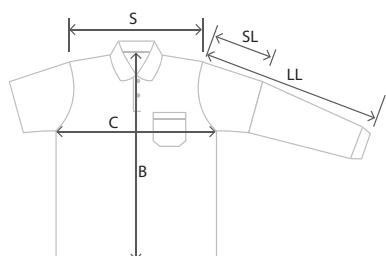

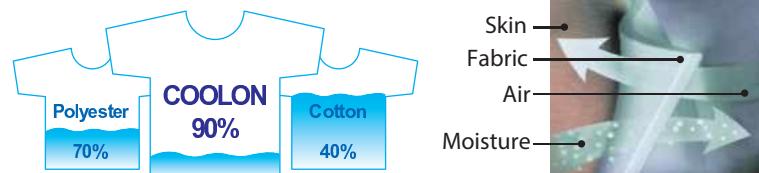

MDF-250CS: T-shirt with collar and short sleeve
MDF-250RS: T-shirt with round neck and short sleeve
MDF-250CL: T-shirt with collar and long sleeve
MDF-250RL: T-shirt with round neck and long sleeve

ESD Coolon T-shirt is made of 100% polyester with embedded ECF (Electro-Conductive Fiber) in stripe pattern. This special fabric, made in Korea, is under well controlled QC, and generates significantly low lint compared to other normal fabric.

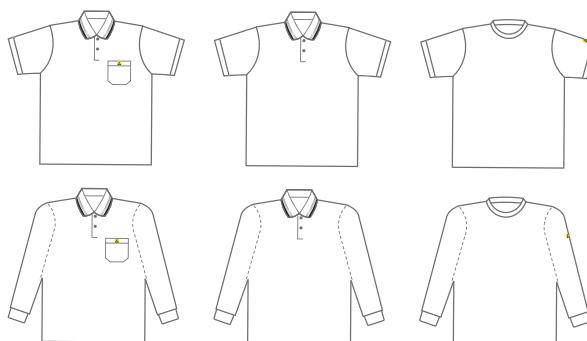

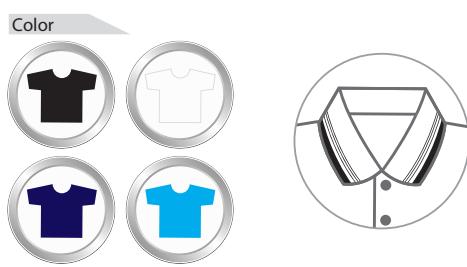

It is comfortable thanks to quick sweat evaporation and good ventilation, and it has extra durability, light weight, etc. The touch is like DuPont Coolmax fabric, which is the material of popular sports wear.

ESD Coolon T-shirt is suitable for the people working in hot and high humidity environment, and is also a good choice for the workers handling ESD sensitive products by virtue of its good ESD properties.

EPA Shirts

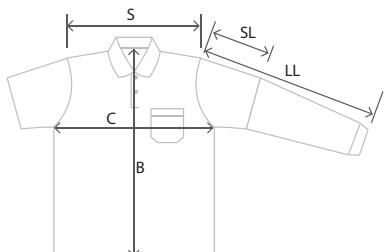

M32-F-001 (S2WH)

Descriptions

- Designed for using in EPA area with on properties.
- No static, quickly disperse the sweat.
- Soft and dry touch like cotton (new coolon fabric)
- Colors: White, Royal Blue, Black
- Tailored in UNISEX Design.
- Colored conductive sewing thread

Sleeve to Sleeve Test

Features

- Meet ANSI/ESD S20.20-2014 (ANSI/ESD STM2.1, Groundable Static Control Garment System)
- Compliance with EN 61340-5-1 and EN 61340-2-1
- Typical surface resistance: 10e6~10e7 ohms. (both sides)

Recommended Cleaning Process

- Machine washable up to 40°C
- Hang dry at 50°C (120°F) or lower
- Tumble-dry at low temperature
- Do not Bleach
- Do not use alkali, acid or fabric softner containing chlorine bleach

1 Fabrics & Garments

ESD Light Gown

Descriptions

- Designed for using in EPA with excellent ESD properties.
- Light weight: 79gr/sqmt
- ESD logo and a pen slot on the pocket
- Grounding studs (Left & Right)
- Cuff snap buttons (Front & Back)
- Fabric: MDF-153U (90% Polyester & 10% Carbon)
- Made In Korea

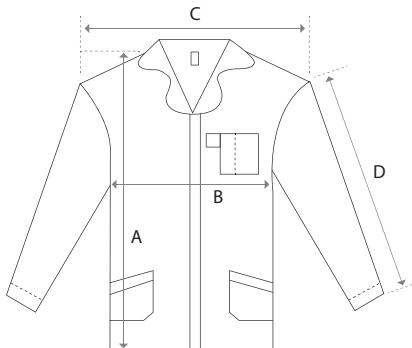

M04-F-013

Features

- Meets the performance under ANSI/ESD S20.20-2014
(ANSI/ESD STM2.1, Groundable Static Control Garment System)
- Compliance with EN 61340-5-1 and EN 61340-2-1
- Typical sleeve to sleeve resistance: less than 3.5×10^7 ohm

Cleanroom Underwear

M12-F-000

Features

- Static dissipative (MDF-199UT, MDF-309)
- High absorbency ratio of sweat
- Soft handle and light weight
- Comfortable feeling
- Free from particle generation
- Pre-filtration of skin flag generated from human body
- Gamma compatible and autoclavable
- Substitutable natural fiber inner-wear

Applications

- Worn underwear with laboratory coverall in cleanroom class 100 to 1 (class M1.5, M2.5, M3.5)
- Worn as an easywear in white gown at the hospital

MDF-309(3-16)

MDF-199UT(3-20)

MDF-199Micro(5-4)

Headgear

M11-F-000

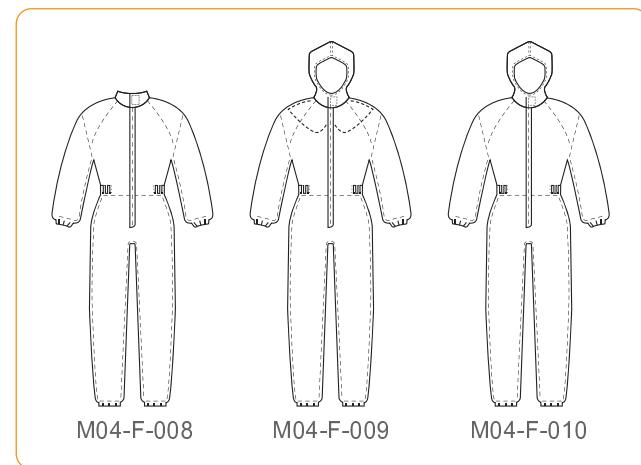

The Headgear is also required in Cleanroom together with Cleanroom garments to block particles generated from worker's head and neck. Customized designs and different fabrics are also available on request.

1 Fabrics & Garments

• Flame Retardant ESD Lab Coat

ECF	BASF (Resist 24DTEX)
Weave	4 bar net (8mm diamond)
Composition	Flame retardant polyester (phosphorous compound based) 95% Conductive carbon yarn mixed warp knif fabric 5%
S/R	10e5 ~ 10e6 ohm

Applications

- SMT line worker
- IC Inspection line
- Mobile phone assembly line
- ESD protected area (EPA)
- Automobile paint curing process line
- Automotive manufacturing

Descriptions

- Mid-thigh length, lapel collar, 3patch pockets with triangular reinforcements, snaps at front opening, sleeve at front opening sleeve hems and snaps on waist pocket upper outside corner
- EPA symbol on the left chest
- Stainless based conductive sewing thread was used
- Color: Royal blue, White
- Fabric: 8mm diamond grid conductive fabric

Features

- Superior self-extinguishing and flame retardant properties
- Free of lint generation from the fabric (100% continuous filament yarn)
- Electrically groundable static control garment system (RTG:<3.5 X 10E7 ohm)
- Meets the performance under ANSI/ESD S20.20-2014 (ANSI/ESD STM2.1, Groundable Static Control Garment System)
- Two snaps for grounding cords
- Porous type fabric pattern gives excellent air permeability
- Quick dry & soft touch

1 Fabrics & Garments

• ESD Chemical Resistant Apron, Sleeves, Open-back Coat and Gown

Chemical Resistant Apron, Sleeves, Coat and Gown are required to protect workers from contamination in Cleanroom or any other working areas handling chemicals as they are waterproof and anti-chemical. They are made of special coated and laminated ESD fabric(MDF-230) and have good ESD properties on the other side.

Apron

M08-F-001

SR: 10e6 - 10e7 ohm
Size: 620mm(W) x 770mm(L)

M25-F-001

1 Fabrics & Garments

• Kevlar/Nomex Sleeves

Exceptional cut slash and heat resistivity.

Dupont™Kevlar® Fiber and Dupont™Nomex® Fiber are almost five times stronger than steel on an equal weight basis and has a high tensile strength that protects arms during hazardous jobs.

Applications

- Great for steel metal
- Glass handling, canning
- Recycling, welding
- Injection molding
- Metal stamping
- Automotive manufacturing
- Steel manufacturing
- Precision assembly

Kevlar Sleeves

M16-F-001

- Dupont™Kevlar® Fiber
- Cut level 3

Length: 14", 18" ($\pm 5\%$)
Weight: 37g, 47g ($\pm 5\%$)
Packing: 100 prs/ctn

Kevlar Terry Knit Sleeves

M16-F-003

- Dupont™Kevlar® Fiber
- Cut level 4
- Excellent wearability
- Soft touch
- Stable heat resistivity
- Invisible stich provides superior comfort on the cuff side

Length: 18" ($\pm 5\%$)
Weight: 188g ($\pm 5\%$)
Packing: 50 prs/ctn

Kevlar Sleeves with Thumb Holes

M16-F-002

- Dupont™Kevlar® Fiber
- Cut level 3
- Extend the protection area to palm & back

Length: 14", 18" ($\pm 5\%$)
Weight: 38g, 46g ($\pm 5\%$)
Packing: 100 prs/ctn

• Cut Resistant Sleeves

M10-F-001

Length: 45cm ($\pm 5\%$)
Weight: 70g ($\pm 5\%$)
Packing: 200 prs/ctn

• Cut Resistant Cool Sleeves

M10-F-002

Length: 37cm ($\pm 5\%$)
Weight: 80g ($\pm 5\%$)
Packing: 200 prs/ctn

Cut Resistant Sleeves/Cut Resistant Cool Sleeves prevent accidents when working with knives and handling other sharp materials and instruments. They are comfortable and have no seam irritating skin trouble.

Features

- Material: HPPE, Nylon, Spandex
- Cut level 3
- Puncture resistance
- Light weight
- Delicate and precise operations

1 Fabrics & Garments

• ESD Socks

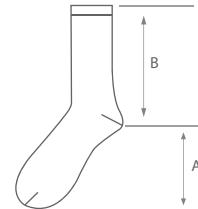

Features

- Good ESD properties
- Low particles generation

Applications

- Assembly work in electronics productions & semiconductors

SR: 10e5 - 10e7 ohm/sq
 Material: Cotton 81%
 Spandex 16%
 Carbon yarn 3%
 Size: M, L, XL
 Color: Light grey
 Packing: 1prs/Bag

	M	L	XL
A	20	23	25
B	13	14	15

• Cleanroom Socks

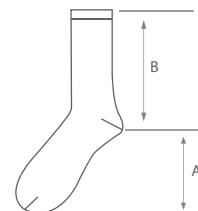

Features

- No particle generation
- Cleanroom compatible

Applications

- Suitable for Cleanroom workers

Material: Polyester 100%
 Size: S, M, L, XL
 Color: White

	S	M	L
A	23	24	25
B	25	26	27

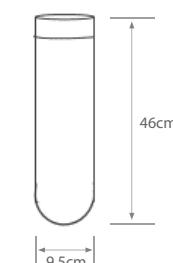

Features

- No particle generation
- Cleanroom compatible
- Tube socks with no heel

Applications

- Suitable for Cleanroom workers

Material: Polyester 100%
 Size: 9.5(W) x 46(L) with 5.3cm cuff
 Color: White, Pink, etc.

1 Fabrics & Garments

• Lint Free Sewing Thread

Non-ESD polyester sewing thread

M13-F-001

- Free of particle generation
- Color: White, Sky Blue, Navy Blue and Olive Green
- Standard Packing: 245 grams/cone, 10 cones/box, 10 boxes/carton

Conductive carbon yarn thread

M13-F-002

- Free of particle generation & ESD control
- S/R: 10e6 ohm
- Color: Grey
- Standard Packing: 245 grams/cone, 10 cones/box, 10 boxes/carton

Conductive stainless yarn thread

M13-F-004

- Meets ANSI/ESD S20.20-2014
- Composition: Polyester 93%, Stainless 7%
- S/R: 10e3 ohm
- Thickness: 466 denier(3 ply)
- Packing: 245grs/cone, 4700m/cone.

Conductive silver yarn thread

M13-F-005

- PHARMACEUTICAL, MEDICAL
- Composition: Polyester 98%, Silver 2%
- S/R: 10e3 ohm
- Thickness: 336denier
- Packing: 245 grs/cone, 6000m/cone

1 Fabrics & Garments

• Conductive Ribbon

M14-F-001

M14-F-002

M14-F-004

- S/R: 10e6 ohm
 - Color: Grey
 - Standard Size & Packing
- 1) Width: 3.2mm / 500 yards/bobbin, 10 bobbins/box
2) Width: 13mm / 100 yards/bundle, 10 bundles/box

Conductive Silver Ribbon

- Width: 6mm
- Length: 1,000yard/bobbin
- Composition: Polyester yarn 98%, Silver yarn 2%
- S/R: 10e3 ohm

M01-A-022 (BUS-380)

M01-A-018 (YUA-331)

Size	220, 225, 230, 235, 240, 245, 250, 255, 260, 265, 270, 275, 280, 290, 300, 310, 320 (mm)
------	--

Material - PU outsole + T/C insole + Artificial leather cover + Nylon mesh fabric

Advantage - RTG : 10e7-10e9 ohm, economical type, light weight, good ventilation, durable and long lasting, less-fatigue, additional stitching of outer sole.

M01-A-014 (PUS-352)

M01-A-015 (PUS-354)

Size	225, 230, 235, 240, 245, 250, 255, 260, 265, 270, 275, 280, 290, 300, 310 (mm)
------	--

2 Footwear

• Static Dissipative Safety Shoes

Material - PU outsole + T/C in sole + Artificial leather cover + Steel toe cap

Advantage - RTG: 10e7-10e9 ohm, safety footwear, recyclable PU outsole, durable and long lasting, non-slip, oil resistant, abrasion resistant, shock absorption.

M05-A-009 (BTU-540)

Size

225, 230, 235, 240, 245, 250, 255, 260, 265, 270, 275, 280, 290, 300 (mm)

• Conductive Slipper

Material - PU outsole + Patented conductive bottom sole + ESD insole

Advantage - RTG: 10e4-10e6 ohm, extremely low static generation, less fatigue, convenient wearability for daily use, long lasting, low particles generation.

M09-A-006 (BPU-435C)

Size

220, 230, 240, 250, 260, 270, 280, 290 (mm)

2 Footwear

• Static Dissipative Slipper

Material - PU outsole + ESD PU or PVC insole + Artificial leather cover

Advantage - RTG: 10e6-10e8 ohm, economical type, less fatigue, convenient wearability for daily use, long lasting, low particles generation.

Size

220, 230, 240, 250, 260, 270, 280, 290 (mm)

• ESD Antifatigue Sandals

M24-A-001

M24-A-002

• ESD Antifatigue Slippers

M25-A-001

	ESD Antifatigue Sandals & Slippers	
Product	1. ESD Antifatigue Sandals	2. ESD Antifatigue Slippers
Type	Type A	Type B
Item Code	M24-A-001	M24-A-002
Surface Resistance	10E5 - 10E6 ohm	
Available Size(mm)	220, 230, 240, 250, 260, 270, 280, 290	

**Sandals and Slippers are made with the same materials

2 Footwear

● Static Dissipative Boots

M02-A-001 (BSB-330)

M02-A-002 (BSB-333)

Material - PVC outsole + ESD insole + Artificial leather cover +
Lint free ESD fabric leggings
Advantage - RTG: 10e6-10e8 ohm, cost effective, anti-slip,
abrasion resistant, low particles generation, durable and long
lasting, good wearability, cleanroom applicable.

Size

220, 225, 230, 235, 240, 245, 250, 255, 260, 265,
270, 275, 280, 290, 300 (mm)

M02-A-008 (PUB-392)

M02-A-009 (PUB-393)

Material - PU outsole + T/C insole + Artificial leather cover +
Lint free ESD fabric leggings
Advantage - RTG : 10e7-10e9 ohm, cost effective design,
light weight, durable and long lasting, less-fatigue,
additional stitching of outer sole, cleanroom applicable

Size

225, 230, 235, 240, 245, 250, 255, 260, 265,
270, 275, 280, 290, 300, 310 (mm)

M02-A-003 (BUB-381S)

M02-A-004 (BUB-382)

M02-A-005 (BUB-383)

M02-A-022 (BUB-388)

M02-A-023 (BUB-389)

Material - PU outsole + ESD insole + Artificial leather cover + Foam Larminating fabric + Lint free ESD fabric leggings + sponge reinforced
Advantage - RTG: 10e6-10e8 ohm, light weight, recyclable PU outsoles, comfortable cushion, extremely low particles generation,
cleanroom applicable

Size

220, 225, 230, 235, 240, 245, 250, 255, 260, 265, 270, 280, 290, 300, 310, 320 (mm)

2 Footwear

● Conductive Boots

Material - Patented conductive PVC outsole + ESD insole + Artificial leather cover + Lint free ESD fabric leggings

Advantage - RTG: 10e4-10e6 ohm, conductive ESD control, extremely low static generation, reliable steady resistivity, no marking on the floor, cleanroom applicable.

Size

220, 225, 230, 235, 240, 245, 250, 255, 260, 265, 270, 275, 280, 290, 300 (mm)

M08-A-001 (BCB-340)

● Static Dissipative Safety Boots

Material - PU outsole + T/C insole + Artificial leather cover + Steel toe cap + Lint free ESD fabric leggings.

Advantage - RTG: 10e7-10e9 ohm, safety footwear, recyclable PU outsole, durable and long lasting, non-slip, oil resistant, abrasion resistant, shock absorption, low particles generation, cleanroom applicable.

M06-A-001 (BTU-530)

M06-A-002 (BTU-533)

Size

225, 230, 235, 240, 245, 250, 255, 260, 265, 270, 275, 280, 290, 300 (mm)

● Conductive Overboots

Material - Patented conductive PVC sole + Lint-free cleanroom fabric + Nylon strap and buckle

Advantage - RTG: 10e4-10e6 ohm, cost effective, soft and flexible, extremely low static generation, reliable steady resistivity, no marking on the floor.

M10-A-001 (BCO-360)

Size

XS, S, M, L, XL

● Static Dissipative Overboots

Material - Static dissipative Fishbone Designed Hypalon Sole(Chlorosulfonated Polyethylene(CSM)+natural rubber+conductive Compound) + Lint-free cleanroom fabric + Polyester strap with snap buttons and buckle

Advantage - RTG: 10e7-10e9 ohm, autoclavable, sterilization compatible, gamma radiation compatible, slip resistance, oil & chemical resistance, high washing temperature, soft and flexible.

M04-A-002 (NHB-370)

Size

XS, S, M, L, XL, 2XL, 3XL

2 Footwear

• Static Dissipative Hypalon Soles

Size	XS	S	M	L	XL	2XL	3XL
Length X Width (mm)	245 X 100	265 X 108	290 X 118	315 X 128	340 X 138	365 X 148	390 X 158
Weight (g/pr) ± 5%	220	255	320	365	410	465	530

M11-A-002 (PHS-110F)

Material - Chlorosulfonated Polyethylene(CSM), natural rubber, conductive compound
Advantage - RTG: 10e7-10e9 ohm, autoclavable, sterilization compatible, clean room applicable, high washing temperature, gamma radiation compatible, slip resistance.

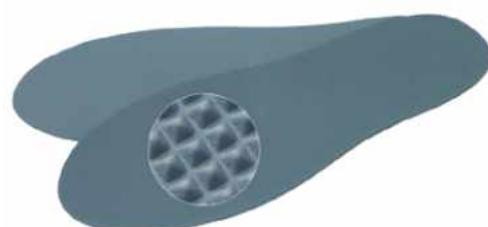

Size	XS	S	M	L	XL	2XL	3XL
Length X Width (mm)	-	265 X 108	290 X 118	315 X 128	340 X 138	365 X 148	390 X 158
Weight (g/pr) ± 5%	-	255	320	365	410	465	530

M11-A-003 (PHS-120P)

Material - Chlorosulfonated Polyethylene(CSM), Natural Rubber, Conductive Compound
Advantage - RTG: 10e7-10e9 ohm, Autoclavable, Sterilization Compatible, Clean Room Applicable, High Washing Temperature, Gamma Radiation Compatible, Slip Resistance.

• Static Dissipative Flat Soles

Size	XS	S	M	L	XL	2XL	3XL
Length X Width (mm)	278 X 117	298 X 120	317 X 125	330 X 132	348 X 135	357 X 140	370 X 147
Weight (g/pr) ± 5%	148	156	180	194	236	256	260

M11-A-004 (PRS-130E)

Material - Synthetic rubber(NBR-35L), Natural rubber, Conductive Compound
Advantage - RTG: 10e8-10e9 ohm, Autoclavable, Sterilization Compatible, Clean Room Applicable, High Washing Temperature, Gamma Radiation Compatible, Soft & Flexible, Light Weight, Slip Resistance.

2 Footwear

- Conductive Grey Soles

M11-A-001 (SUO-442)

Material - PVC, Conductive compound

Advantage - RTG: 10e4-10e6 ohm, extremely low s/generation, economical type, slip resistance

Size	XS	S	M	L	XL	2XL	3XL
Length X Width (mm)	260 X 108	290 X 110	310 X 118	330 X 128	350 X 133	-	-
Weight (g/pr) ± 5%	270	330	370	400	410	-	-

- Conductive NBR Soles

M11-A-006 (PRS-140C)

Size	XS	S	M	L	XL	2XL	3XL
Length X Width (mm)	245 X 100	265 X 108	290 X 118	315 X 128	340 X 138	365 X 148	390 X 158
Weight (g/pr) ± 5%	220	255	320	365	410	465	530

Material - Synthetic rubber(NBR-35L), natural rubber, conductive compound

Advantage - RTG: 10e6-10e7 ohm, autoclavable, sterilization compatible, clean room applicable, high washing temperature, gamma radiation compatible, silicone & phthalate free, slip resistance.

2 Footwear

• Autoclavable Footwear

- Resistant to repeated autoclave procedures
- Widely used in all kinds of working environment where sterilization is needed
- Dust generated by abrasion can be minimized by using specially treated polyester lining
- Anti-slip and easy to wear
- Cleanroom Shoes / Boots withstand high temperature and high pressure sterilization(at 121 °C Autoclave for 15 min.)

AUTO
CLAVE

M15-A-004

M15-A-005

Ideal for general operation in controlled environment

Material : Special compound rubber / Polyester lining / Polyester leggings (option)

AUTO
CLAVE

SAFETY

M23-A-002

Steel toe cap

Ideal for handling heavy products in controlled environment

Material - Special compound rubber / Polyester lining / Steel toe cap / Polyester leggings (option)

Size

230, 240, 250, 260, 270, 280, 290 (mm)

2 Footwear

• Safety Rubber Boots Series Chemical Resistant Safety Boots

M17-A-001

M17-A-002

- Resistant to 15 chemical materials
- Material: Natural rubber + Hypalon
- Steel toe cap
- S/R 10e6 - 10e8 ohm(ESD Type)

Chemical	CAS Registry Number
Acetone	67-64-1
Dichloromethane	75-09-2
Toluene	108-88-3
Diethylamine	109-98-7
Tetrahydrofuran	109-99-9
Ethyl Acetate	141-78-6
N-Hexane	110-54-3
Sodium Hydroxide 40%	1310-73-2
Sulfuric Acid 96%	7664-93-9
Nitric Acid (65±3)%	7697-37-2
Acetic Acid (99±1)%	64-19-7
Ammonia Solution (25±1)%	1336-21-6
Hydrogen Peroxide (30±)%	124-43-6
Isopropanol	67-60-0
Sodium Hypochlorite (13±)%	7681-52-9

Acid Resistant Safety Boots

M18-A-001

Chemical
Acetone
Acetonitrile
Diethylamine
Ethyl Acetate
N-Hexane
Methanol
Toluene
Dimethylformamide
Phosphoric Acid
Sulfuric Acid 80%
Hydrochloric Acid 37%
Nitric Acid 60%

- Inorganic Acid resistance
- Material: Natural rubber + Hypalon
- Steel toe cap

Oil resistant Safety Boots

M20-A-001

- Material: Natural rubber + NBR
- Steel toe cap

Alkali Resistant Safety Boots

M19-A-001

Chemical
Sodium Hydroxide Solution 20%
Ammonia Solution 28%

- Strong alkali chemical resistance
- Material: Natural rubber + SBR
- Steel toe cap

General Safety Boots

M21-A-001

- Material: Natural rubber
- Steel toe cap

2 Footwear

• Non-slip Slippers

M10-Q-001

Non-Slip
(Oil&Water)

M10-Q-002

Upper: EVA
Sole: Rubber
Color: Pink, Grey
Size (Pink – 240, 250mm, Grey – 250, 260, 270, 280mm)
Non-slip sole(*COF: 0.48)

• ESD Non-slip Sandals

M11-Q-002

Anti-Static

Non-Slip
(Oil&Water)

Breatheable

Toe Hard-cap

M11-Q-001

Upper: EVA + ABS Toe Cap
Sole: Rubber
Color: White, Black
Size: 230mm~300mm(10mm interval)

Features

- Non-slip sole(COF: 0.44)
- Supper light weight(255g/piece, 260mm)
- ESD properties: $0.1\text{Mohm} < R < 10\text{Mohms}$
- Laboratory, Hospital, Kitchen, Semiconductor,
- Good chemical resistance
- Hard toe cap
- 3 ventilation holes

• Non-slip Rubber Shoes

M12-Q-001

Non-Slip
(Oil&Water)

Cook&Kitchen

Upper: EVA
Sole: Rubber
Color: Black
Size: 250mm~300mm(10mm interval)

Features

- Non-slip sole(COF: 0.44)
- Supper light weight(218g/piece, 260mm)
- Good chemical resistance
- 4" heel cup

* COF : Coefficient of Friction

2 Footwear

● Insulative Safety Shoes

Upper: Natural Cowhide, Steel Toe Cap
 Sole: Phylon & Rubber, Kevlar+Aramid
 Color: Black
 Sizes: 230~300mm(5mm interval)

Features

- Certificate No: 18-AV2CR-0311
- Insulation up to 14,000V
- Anti-Puncture middle soles
- Air Mesh Inner soles
- Dial lace adjuster

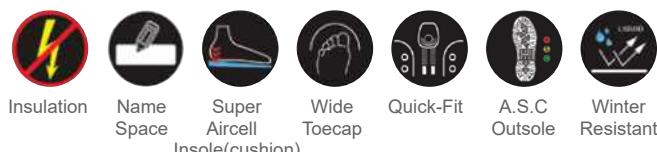

M13-Q-001

Insulation 3M Reflection Wide Toecap Super Aircell Insole(cushion) Dial Lock Winter Resistant

M13-Q-002

Insulation Name Space Super Aircell Insole(cushion) Quick-Fit A.S.C Outsole Winter Resistant

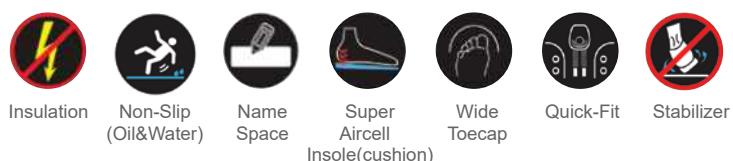

Upper: Natural Cowhide, Steel Toe Cap
 Sole: Phylon & Rubber
 Color: Black
 Sizes: 230~300mm(5mm interval)

Features

- Certificate No: 18-AV2CR-0172
- Insulation up to 14,000V
- Sandwich Mesh Inner cover
- ASC special outsole
- Reinforced heel parts
- Anti-Puncture middle soles
- Lace adjuster

M13-Q-003

Insulation Non-Slip (Oil&Water) Name Space Super Aircell Insole(cushion) Wide Toecap Quick-Fit Stabilizer

Upper: Natural Cowhide, Steel Toe Cap
 Sole: Phylon & Rubber
 Color: Black
 Sizes: 230~300mm(5mm interval)

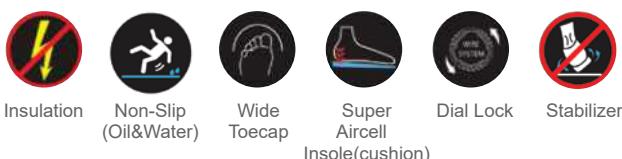

Features

- Certificate No: 18-AV2CR-0147
- Insulation up to 14,000V
- Sandwich Mesh Inner cover
- ASC special outsole
- Reinforced heel parts
- Anti-Puncture middle soles
- Ankle stabilizer
- Lace adjuster

2 Footwear

M13-Q-004

Insulation Non-Slip (Oil&Water) Wide Toecap Super Aircell Dial Lock Insole(cushion) Stabilizer

Upper: Synthetic & Cordura Mesh
Sole: Phylon & Rubber, Kevlar+Aramid
Color: Grey
Sizes: 230~300mm(5mm interval)

Features

- Certificate No: 18-AV2CR-0146
- Insulation up to 14,000V
- Non-slip sole(COF: 0.25)
- Cordura double mesh
- Nanotex waterproof fabric
- Anti-Puncture middle soles
- Ankle stabilizer
- Dial lace adjuster

M13-Q-005

Insulation Non-Slip (Oil&Water) Wide Toecap Super Aircell Dial Lock Insole(cushion) Stabilizer

Upper: Artificiality Nubuck & Cordura Mesh, Steel Toe Cap
Sole: Phylon & Rubber
Color: Grey
Sizes: 230~300mm(5mm interval)

Features

- Certificate No: 18-AV2CR-0347
- Insulation up to 14,000V
- Coefficient of Friction(sole): 0.25
- Cordura double mesh
- Nanotex waterproof fabric
- Anti-Puncture middle soles
- Ankle stabilizer
- Dial lace adjuster

● ESD Non-slip Safety Shoes

M14-Q-001

Anti-Static Non-Slip (Oil&Water) Name Space Ventilation (In&Out) Super Anti-static Reflection 3M Wide Toecap Insole(cushion)

Upper: Synthetic & Sandwich Mesh, Steel Toe Cap
Sole: Phylon & Rubber
Color: Grey
Sizes: 230~300mm(5mm interval)

Features

- Certificate No: 18-AV2CR-0203
- ESD Properties: $0.1\text{Mohm} < R < 100\text{Mohm}$
- Non-slip sole(COF: 0.25)
- Anti-Puncture middle soles
- Lace adjuster

2 Footwear

Upper: Synthetic material, ABS Toe Cap
 Sole: Phylon & Rubber
 Color: Black
 Sizes: 230~300mm(5mm interval)

Features

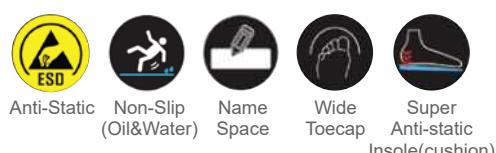

- Certificate No: 18-AV2CR-0247
- ESD Properties: $0.1\text{Mohm} < R < 100\text{Mohm}$
- Non-slip sole(COF: 0.25)
- Anti-Puncture middle soles
- Lace adjuster
- Air mesh upper sole

M14-Q-002

M14-Q-003

Upper: Synthetic & Sandwich Mesh, Steel Toe Cap
 Sole: Phylon & Rubber
 Color: Black
 Sizes: 230~300mm(5mm interval)

Features

- ESD Properties: $0.1\text{Mohm} < R < 100\text{Mohm}$
- Non-slip sole(COF: 0.25)
- Anti-Puncture middle soles
- Dual Velcro

M14-Q-004

Upper: Natural Cowhide & Synthetic material, Steel Toe Cap
 Sole: Phylon & Rubber
 Color: Black
 Sizes: 230~300mm(5mm interval)

Features

- Certificate No: 18-AV2CR-0286
- ESD Properties: $0.1\text{Mohm} < R < 100\text{Mohm}$
- Non-slip sole(COF: 0.25)
- Anti-Puncture middle soles
- Dual Velcro

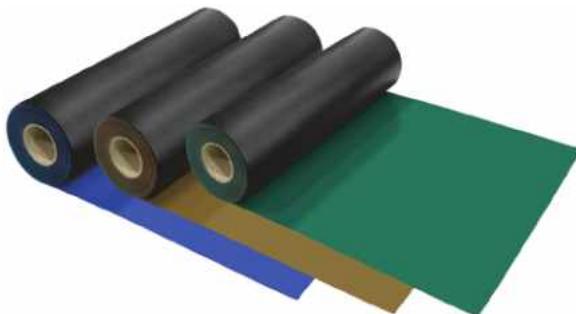

3 Mats & Tiles

How to make ESD safe work surface? Polstar ESD Control Table Mat is on the basic line of this question. Polstar ESD Control Table Mat has two co-extruded layer constructions, and these two layers are strongly stuck together and become homogenous body.

Thanks to its stable quality and stable surface resistance, our ESD Control Table Mat is commonly used as the top material of assembly lines, worktable, etc. in electronics and semiconductor factories and many other static controlled areas.

• ESD Control Table Mat

- ① Standard: M11-M-000
- ② Low SR Type: M29-M-000
- ③ With Bottom Adhesive: M25-M-000

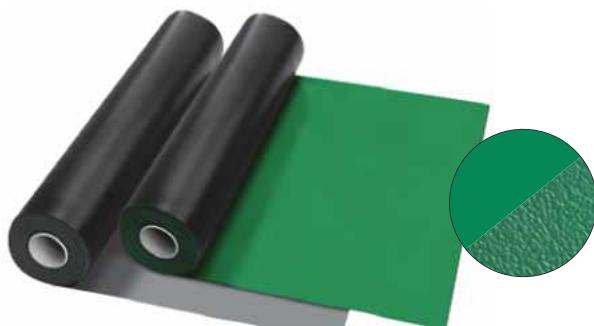

M11-M-000

Thickness: 1.5mm, 1.8mm, 2mm, 3mm
Width: 60cm~120cm
Length: 10m / roll
Top: 10e8~10e9 ohm (Standard)
10e7~10e8 ohm (Low SR)
Bottom: 10e3~10e5 ohm

• ESD Control PVC Mat

M18-M-000

Thickness: 1.6mm
Widths: 60cm~120cm
Top: $\leq 10e9$ ohm
Bottom: $\leq 10e6$ ohm

Features

- Smooth dull surface, embossed dull surface
- Thicker color layer(color: 0.8mm / bottom: 0.8mm)
- No smelling
- No curl on the edge of the mat

• Conductive Black Mat

M13-M-000

Homogenous black rubber
SR: 10e3~10e5 ohm
Thickness: 1.3, 1.5, 2, 3mm
Width: 60cm~120cm
Length: 10m / roll

• Embossed ESD Rubber

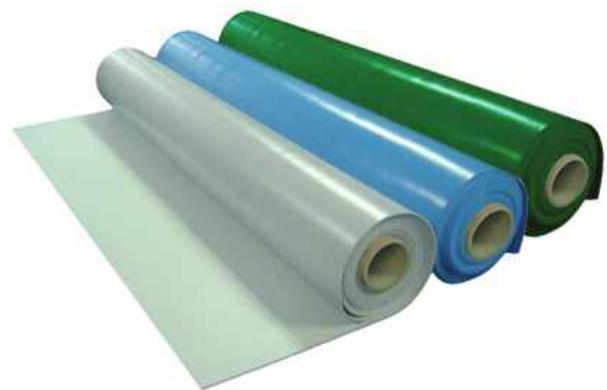

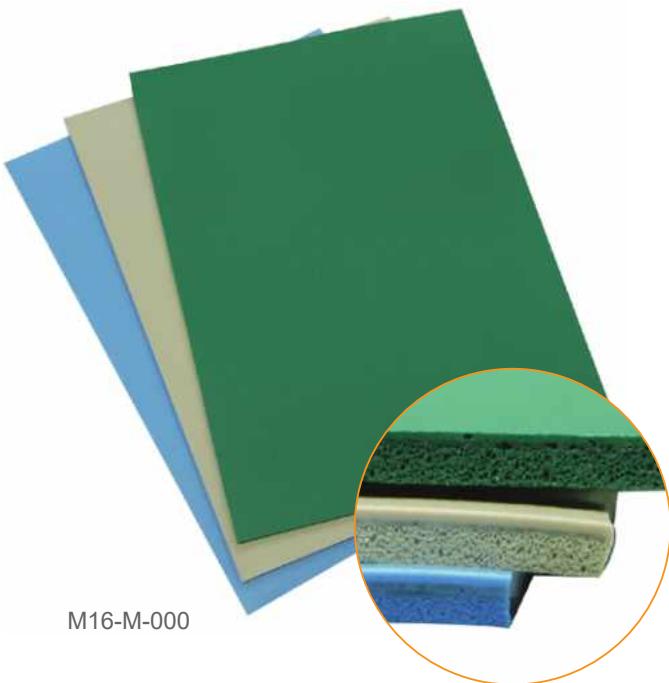

M14-M-000

- 1) Top & Bottom: embossed surface
- 2) Top & Bottom: embossed with inside texture
- 3) Top: normal surface, Bottom: embossed surface

Thickness: 1.8mm
Length: 10m / roll
Top: 10e8~10e9 ohm
Bottom: 10e3~10e5 ohm

3 Mats & Tiles

- 3 Layer Static Dissipative Mat

The 3 layer Static Dissipative Mat consists of smooth top, cushioning bottom dissipative vinyl layer and conductive grid mesh inner layer, which provides fast discharge path to ground and energy absorption of components susceptible to physical shock by its unique structure.

Features

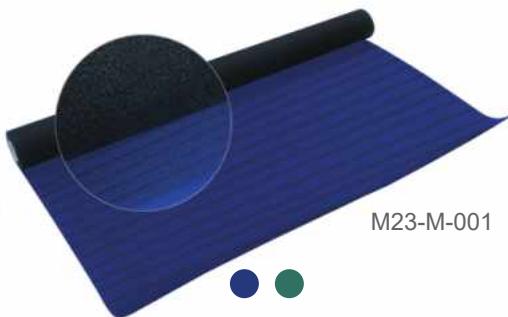

- Smooth surface
- Light weight provides easy installation on workstations
- Easy to pick up small components on the mat
- Excellent electrical properties and performance
- Carbon free constructions
- Easy cleaning with soap and water without affecting its static dissipative properties

Material	PVC + conductive grid mesh + foamed PVC	
Thickness	mm	3 ± 5%
Width	Inch, cm	24", 36", 48", 90cm, 100cm, 120cm
Length	m	10, 15
Color	Light Blue, Grey, Green	
RTG	Ω	≤ 10e9
RTT	Ω	≤ 10e9
Heat Resistance	°C	Max 90

3 Mats & Tiles

• ESD Microfiber EVA Mat

- ESD Microfiber fabric(4mm stripe)
- Conductive EVA foam

Thickness: 2.5mm
Size: 0.96m x 9.5m
SR: top-10e6 +/- 1 ohm, bottom - 10e5 +/- 1 ohm
Color: Dark Navy Blue
Packing: 4rolls/carton, 27.20kgs/carton
(ctn size: 360mm x 360mm x 1118mm)

• ESD Microfiber EVA Mat with Adhesive

M23-M-002

- ESD Microfiber fabric(4mm stripe)
- Conductive EVA foam
- Acrylic adhesive
- Releasing paper

Thickness: 2.7mm
Size: 0.96m x 9.5m
SR: top-10e6 +/- 1 ohm, bottom - 10e5 +/- 1 ohm
Color: Dark Navy Blue
Packing: 4rolls/carton, 37.20kgs/carton
(ctn size: 400mm x 400mm x 1118mm)

Application

- Tabletop of assembly lines for sensitive electronic parts.

Frictional coefficient

- 0.754 (KS M ISO 8295: 2006) - Static friction
- 0.684 (KS M ISO 8295: 2006) - Dynamic friction

Hardness : 41 (KS M 6518: 2006, Type A)

Features

- Smooth, soft and anti-scratch surface
- Cushion for easy grip
- Good ESD properties
- Light weight
- Easy installation with bottom adhesive treatment (M23-M-002)

• ESD Microfiber Mat with Adhesive

M23-M-003

- ESD Microfiber fabric(4mm stripe)
- Conductive Non-woven fabric
- Acrylic adhesive
- Releasing paper

Thickness: 0.9mm
Size: 0.7m x 10m
SR: top-10e6 +/- 1 ohm, bottom - 10e5 +/- 1 ohm
Color: Dark Navy Blue
Packing: 4rolls/carton, 18.3kgs/carton
(ctn size: 317mm x 317mm x 715mm)

• ESD Microfiber Fabric with Adhesive

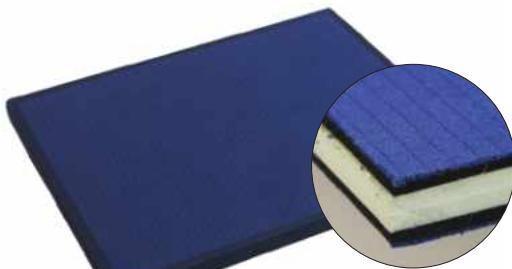

M32-M-000

- ESD Microfiber fabric(4mm stripe)
- Acrylic adhesive
- Releasing paper

Thickness: 0.7mm
Size: 1.37m x 23~37m
SR: top-10e6 +/- 1 ohm, bottom - 10e5 +/- 1 ohm
Color: Dark Navy Blue
Packing: 4rolls/carton, 18.3kgs/carton
(ctn size: 317mm x 317mm x 1620mm)

3 Mats & Tiles

• ESD Microfiber EVA Pad

M26-M-001 (320mm x 240mm)
M26-M-002 (220mm x 170mm)

- ESD Microfiber EVA Mat
- Foam board(5T)
- ESD Microfiber EVA Mat

Application

- Mini worktable for assembling small devices, which are sensitive for ESD.

Features

- Soft and smooth surfaces
- Anti-scratch and ESD safe surface
- Use both top and bottom surfaces
- Custom size available

Thickness: 10mm

Size: 320mm x 240mm / 220mm x 170mm

Material: ESD Microfiber EVA Mat on top and bottom,
Foam Board(5T), ESD Microfiber Tape

SR: 10e6 +/- 1 ohm

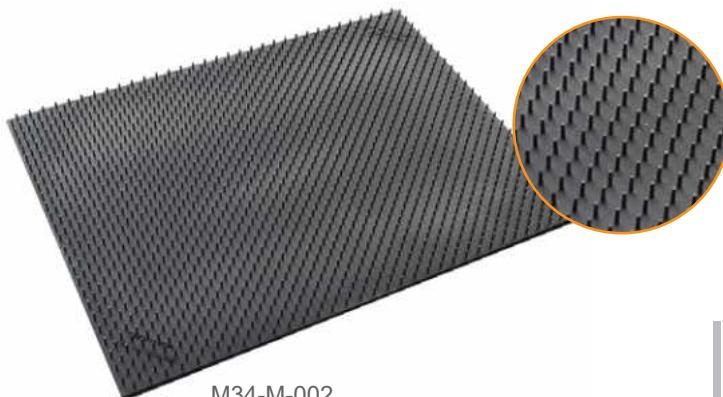

Color: Dark Navy Blue

Frictional coefficient

- 0.754 (KS M ISO 8295: 2006) - Static friction
- 0.684 (KS M ISO 8295: 2006) - Dynamic friction

Hardness : 41 (KS M 6518: 2006, Type A)

• ESD Pin Mat

M34-M-002

Size: 11mm x 300mm x 400mm

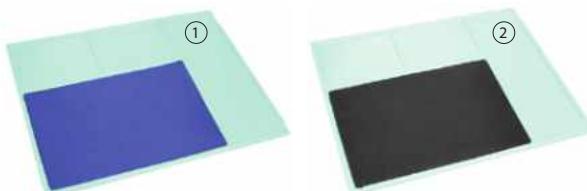

SR: 10e5~10e8 ohm (top)

Material: Silicon

• ESD Repair Mat

M35-M-001

Size: 7mm x 320mm x 410mm

SR: 10e7-10e8 ohm (top) / 10e4~10e5 ohm (bottom)

Material: NBR

Options

- ① ESD Microfiber Mat(0.9mm x 189mm x 287mm)
- ② ESD Silicon Mat(2.3mm x 189mm x 285mm)

3 Mats & Tiles

• ESD Microfiber mat

Size: 1.4mm x 300mm x 400mm
SR: 10e6~10e7 ohm (top) / 10e4~10e5 ohm (bottom)
Material: Microfiber fabric + conductive rubber

• ESD Silicon Mat

Size: 2.3mm x 300mm x 420mm
SR: 10e5~10e8 ohm (top)
Material: Silicon

• ESD Edge Protector

Material: foamed rubber
SR: 10e8~10e9 ohm
Application: edge protection for tables

① 15mm x 15mm x 100m(roll)
② 15mm x 38mm x 50m(roll)

• ESD Edge Protector

Material: rubber
SR: 10e4~10e5 ohm
Application: edge protection for sheets

③ 10mm x 2.5mm x 100m(roll)
④ 15mm x 5mm x 100m(roll)
⑤ 15mm x 9mm x 100m(roll)

• ESD Antifatigue Mats

Polstar ESD Antifatigue Mats are suitable for assembly lines and other workplaces, where long-standing jobs are frequently required, to reduce workers' fatigue from their jobs. Round shape rugged surface provides a finger-pressure therapy effect on feet, and the formed smooth materials used make physical workers comfortable by helping to release the stress of the workers.

Specially designed and constructed ESD antifatigue mats not only have a good function to relieve the stress of feet and legs, but also give a quick pathway for the static electricity charged in human body to the ground.

There are 8 different types of ESD antifatigue mats and 1 type of ESD antifatigue mat in Roll in our range. This classification was done by the materials used.

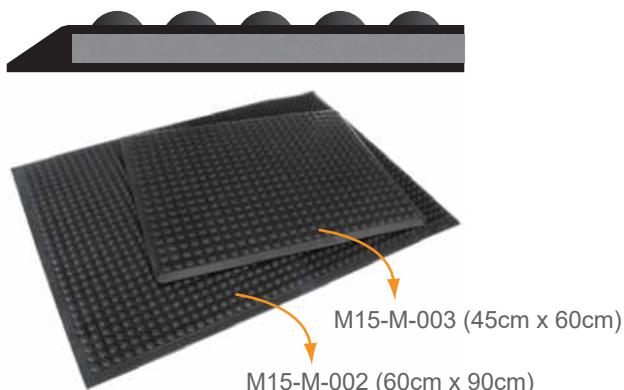

Type A & E are made of conductive Nitrile-Butadiene Rubber(NBR) and soft Polyurethane(PU) sponge, Type C, D & K are made of 100% Conductive or Static Dissipative NBR, Type N is made of 100% PU material, Type H & T are made of 100% foamed rubber and ESD antifatigue mat in Roll is made of foamed polyvinyl chloride(PVC).

On the other hand, our ESD antifatigue mats can be classified as a normal edge shape, an interlocking design and ESD antifatigue mat in Roll by their shapes. The normal edge shape is suitable for an individual worker while the interlocking design and the ESD antifatigue mat in Roll are ideal for a wide area, where a certain whole place is required as "Antifatigue Zone".

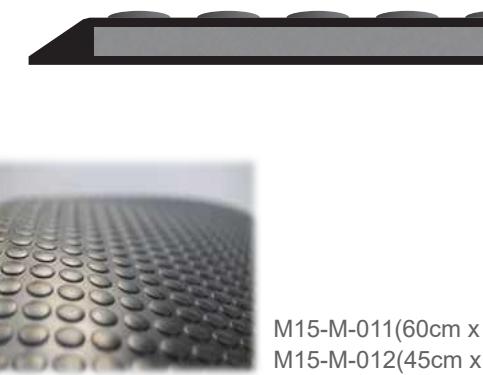

The ESD antifatigue mats are also classified into 2 types by their ESD properties. Type A, E, C, D & K(M15-M-022) have conductive readings whereas Type N, H, I, K(M15-M-021) & ESD antifatigue mat in Roll have static dissipative readings.

3 Mats & Tiles

• Conductive/Dissipative Tiles

Conductive & Static Dissipative Vinyl Flooring Tiles are the best solution for ESD protected floor, which will reduce static build up on people and materials. The Tiles are directly installed on the ground floor and they are also commonly used as the finishing material of Raised (Access) Floor System.

The electrical properties are permanent and they are not affected by ambient humidity. High contents of poly vinyl and high-pressure manufacturing process provide excellent indentation, wear and chemical resistances.

M06-M-010	

Brief Installation Instructions

1. Preparation of Subfloor

1) Flatness

- Maximum variation of the subfloor allowable is 3.0mm in 3 meter square.

2) Humidity of concrete subfloor

- Under 5.0LBS per 1,000sqft in 24 hours by Calcium Chloride Moisture Test in accordance with ASTM E 1907/ASTM F 1869.
- Under 2.5% measured with CM Hygrometer(without floor heating)

3) PH Level

- Under 10

4) Smoothness and Surface

- Subfloor must be clean, dry and free from dust and dirt.
- Cracks and irregular surface must be patched and leveled, using a good grade of the floor finishing materials, like smoothing compound, etc.

5) Prior to installation, the flooring tiles should be acclimated for at least 48 hours.

6) Recommendable temperature will be at 20°C.(At least from 18°C to 30°C) and constant temperature should be maintained during and after the installation for at least 48 hours.

2. Conductive Adhesive

Suitable adhesive should be consulted and selected by authorized personnel, who manage the job site conditions, from the following selections:

- Carbon Fiber Type: Water based fiber mixed Conductive acryl adhesive
- Carbon Powder Type: Water based carbon mixed Conductive acryl adhesive
- 2 Parts Epoxy: 2 component environment friendly conductive epoxy adhesive
- PU Epoxy: Solvent based Conductive Urethane Rubber Adhesive

The recommended quantity of adhesive is 0.25kg / sqmt.

3. Copper Tape

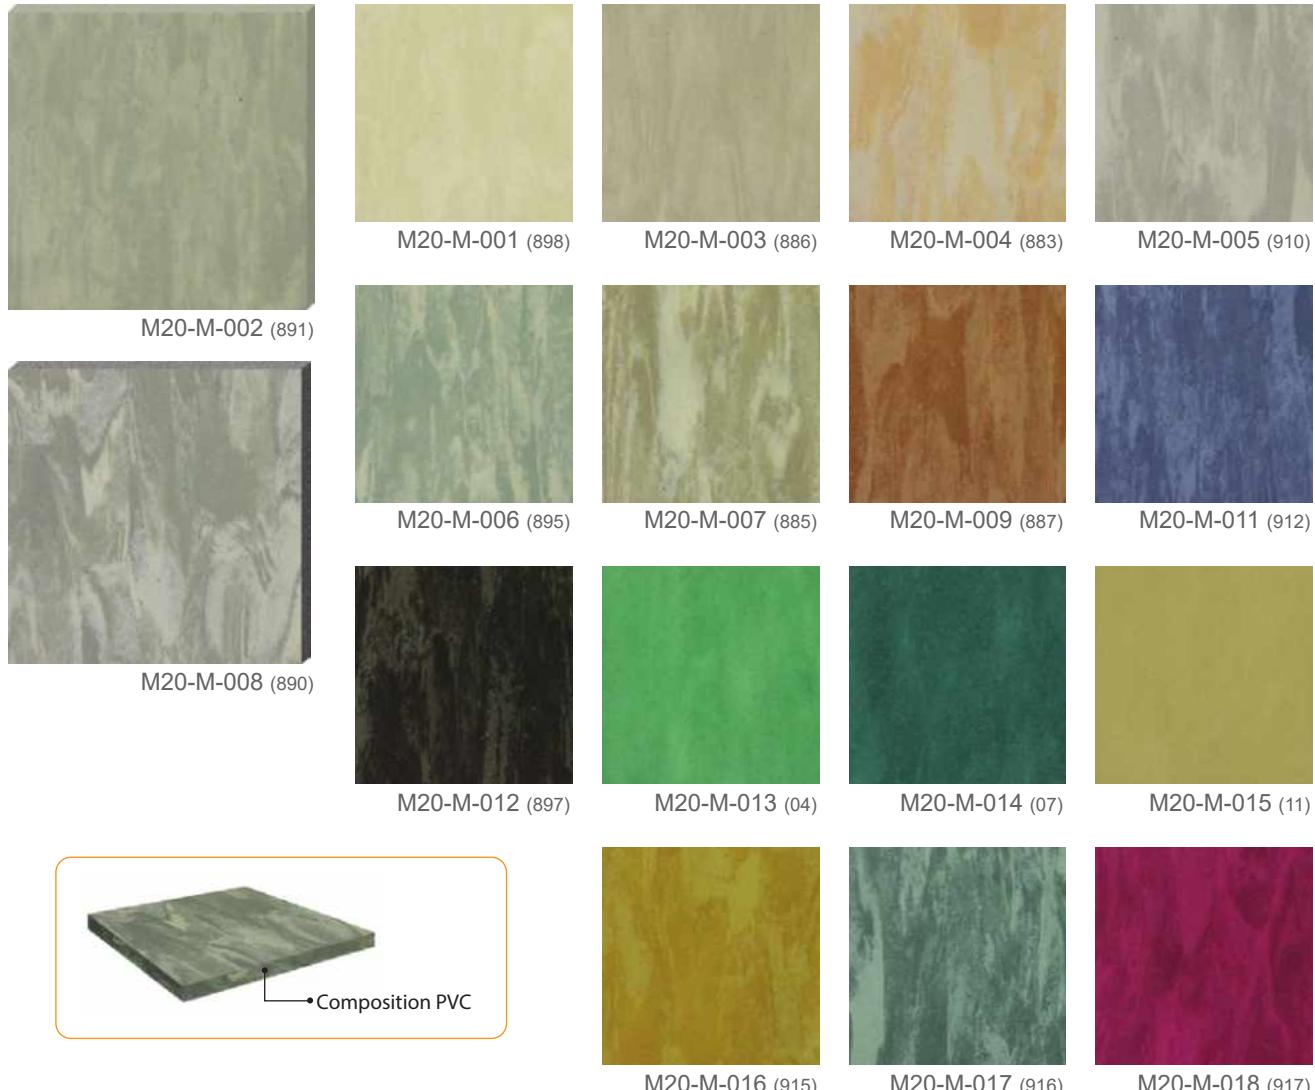

- Install the Copper Tape according to the interval standard of floor electric resistance requirements(ConductiveTile: 3m, Static Dissipative: 6~8m in cross section)
- Crossing points of Copper Tape lines should be punched in 3 mm diameter to secure the connection.
- Final grounding connection to the grounding points must be performed by authorized electrician or engineer.

4. Welding

- Seamless floor covering can be applied to prevent moisture troubles and to reduce dust and particles rising from the floors.
- Make the groove around 70~80% depth comparing to the original thickness of the tiles using electric grooving or hand grooving tools
- Trim off the excess parts of welding rod with the crescent -shape knife after the welding.

3 Mats & Tiles

- Composition Deluxe Tile

* The color shade may vary slightly in each production LOT.

Features

- The most economical vinyl floor covering material
- Homogeneous structure provides constant color pattern to the bottom end
- Easy maintenance and high durability
- Excellent abrasion resistance
- Flame retardant

Main Applications

- Office Building (Hall, Lobby, Corridor, Lift, Office area, Stair, Warehouse, etc.)
- Hospital (Corridor, Office area, etc.)
- School (Hall, Lobby, Corridor, Lift, Class Room, Restaurant, etc.)
- Shopping mall (Hall, Lobby, Corridor, Lift, Warehouse, etc.)
- Hotel (Corridor, Lift, etc.)
- Apartment (Corridor, Entrance, etc.)

Features

- All products are made of austenitic stainless steel grades, 304 and 316L, which are suitable for any cleanroom environment.
- All products are specifically designed for cleanroom environment.
- Able to provide all custom-made products used in smock rooms or cleanrooms.
- Chemical resistant and HACCP certified products are available.

5 Clean Products

Clean Products consist of several types of products, such as Sticky Mat, Sticky Roller, Protection Film, DCR-Pad, Silicone Rubber Roller, Cleanroom Mop System, Swabs, etc. All these items are related with cleaning dust or particles and keeping sensitive parts, components and finished products clean by controlling all kinds of contaminations.

• Sticky Mat

M01-C-000

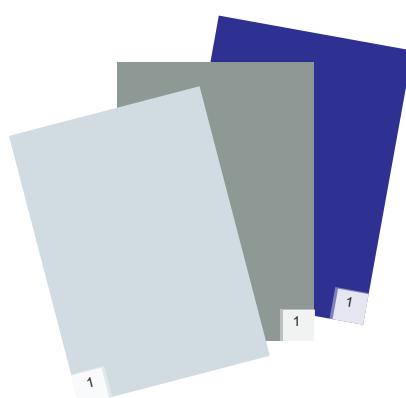

Size: 18" x 36", 18" x 45", 24" x 36", 26" x 45", etc.
 Color: Blue, Grey, White, Light green, Clear
 Packing: 30sheets or 60sheets/mat, 4mats, 8mats,
 10mats/case, etc.

Features

- 99.80% of dust collection at several steps on the mats.
- Collected dust on the mats is not migrated.
- Comfortable walking and smooth passing of hand carts.
- Mat can be used with/without the frame.
- Adhesive level can be adjusted on request.
- Antimicrobial sticky mat is available for pharmaceutical, biological and medical areas.
- ESD sticky mat is available for static sensitive areas.
- Thin film sticky mat at economic price is another option.

Varieties

- SM-SSM - Sticky mat (Standard)
 SM-TNM - Thin film sticky mat
 SM-ABM - Antimicrobial sticky mat
 SM-EBM - ESD antimicrobial sticky mat
 SM-ESM - ESD sticky mat

- PCB Cleaning Roll

Material: PP
Color: White
Size: 3" x 600mm x 20m or 25m

Normally, PCB Cleaning Roll goes with machine, not with a handle, and this roll is mainly designed for cleaning PCB. To clean the surface of PCB effectively, perfect flat conditions of the roll are essential. Several different adhesive levels are available for different applications.

5 Clean Products

- PE Sticky Roller & Antistatic PE Sticky Roller

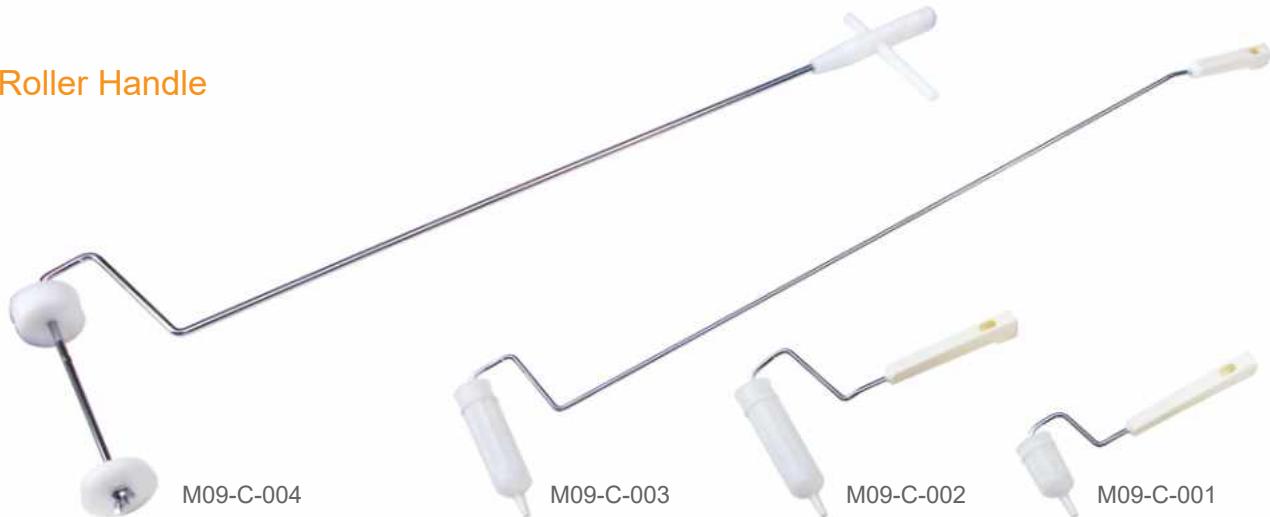

Color: Blue, White, Transparent
 Size: 100, 150, 160, 200, 250, 300, 450, 500 mm, etc.
 Length: 20m/roll
 Core: 38mm, 76mm (3")

- Non-Woven Sticky Roller

Color: White
 Size: 80, 160, 320 mm
 Length: 10, 20m/roll
 Core: 38mm, 76mm (3")

- Roller Handle

Item code	Descriptions			Size			Material			Packing

5 Clean Products

• ESD PET Adhesive Film

Polstar-EWF is a good choice to make ESD surface economically by simply attaching high quality ESD treated adhesive film on the surface, like glass, acrylic, PC, etc. This film can also be used as a protection film for protecting the surfaces or devices from scratches during handlings, transportation, etc.

Features

- Good ESD properties on backing side.
- Semi-permanent ESD properties.
- No migration.
- Very low removal adhesive.

- ESD hard coated PET Film(50, 75, 100 μm)
- Silicone Adhesive(20 μm)
- Release Film (25 μm)

Physical Properties

Properties		Unit	Value	Test Method
Film		-	ESD hard coated PET	
Adhesive		-	Silicone	
Thickness	Backing	μm	50 ± 2, 75 ± 2, 100 ± 2	
	Adhesive		20 ± 3	
Color		-	Clear	
Adhesion		gf/25mm	20 ± 3	ASTM D 1000
Resistance	Adhesive	$\Omega/25\text{mm}$	-	ASTM D 257
	Backing		Max. 10 ⁵ -8	
Electrostatic Discharge		sec	Max. 0.1	
Size		mm, m	1000 ~ 1200mm X 100m, 200m	

How to apply the film on the surface effectively

1. Keep the surface free of dust, dirts, moisture, etc.
2. Measure the area where the film is applied and cut the film with extra 1-3 cm.
3. Prepare spray bottle with purity water mixing water-soluble detergent, like shampoo(8-10 drops of detergent for 1 litter water).
4. Spray the prepared water on the surface to make the surface wet and slippery.
5. Remove the releasing sheet from the film and also spray the water on the adhesive area of the film.
6. Attach the film on the surface from the center of the area and press the film out from the center to edge sides smoothly several times by using of a flat and soft scoop until the moisture and the air bubbles are completely removed.
6. Cut the film fitting in the surface perfectly.

* Please do not press or wipe edge side strongly until the margin of the film is cut-off

* Please do not use any kinds of chemicals and solvents for cleaning.

* Use very soft wiper with water soluble detergent for surface cleaning.

5 Clean Products

• ESD PET Film

Polstar ESD PET Film is suitable for PCB manufacturing assembly lines for PCB testing, and this film will also be used as a transparent copy film. Antistatic treatment on both surface gives semi-permanent ESD properties.

Thickness: 50/75/100 μm
Width: 1000mm ~ 1250mm
Surface Resistance (both sides): 10e5~10e8 ohm

- Antistatic Treatment
- PET Film (50 μm , 75 μm , 100 μm)
- Antistatic Treatment

• Protection Film

Protection Film are widely used in various objects that need surface protection from outer impact, contaminations, scratches etc. They are used on stainless steel, AL sheet, acrylic sheet, powder coated steel, wooden flooring, PVC sheet and many others.

There are a number of variations in Protection Film. So it is always recommended to contact mecind@mecind.co.kr or person you know for more information.

● Glove Cleaner

Wearing on and off the gloves every time you clean them is not the most efficient way to work with them. The Glove Cleaner, however, will make it significantly easy and time-saving. The workers can put their hands on the cleaner while wearing the gloves, and simply push or pull their hands as the cleaner does its job. The cleaner serves numbers of purposes in various manufacturing process, and it does not matter where you put the cleaner as long as it is close enough to the workers.

Features

- Stainless Steel Body offers great durability
- The nature of compact design makes it very mobile
- Can be mounted on either table or wall
- The adhesive rolls have cutting lines to make them easy to peel off
- Non-woven, PE and PP rollers are available

M30-C-001

Item	Non-woven Sticky Roll	PE Sticky Roll	PCB Cleaning Roll
Material	Non-woven	Polyethylene	PP Synthetic Paper
Core	3" PE Core, 155mm x 15m	3" PE Core, 150mm x 20m	3" PE/ABS Core, 155mm x 20m
Thickness	180 μ m	47 μ m	80 μ m
Adhesion	250~350g/25mm	400~500g/25mm	600~800g/25mm

5 Clean Products

• DCR-Pad

M14-C-000

Features

- Use with reusable Rubber Rollers.
- Excellent cleaning guaranteed.
- Cost-effective.
- Variations available;
 - 1) DCR-Pad with full adhesive area (standard)
 - 2) BCR-Pad with adhesive free area
 - 3) Black colored DCR-Pad for better dust visibility

Adhesion (gf/25mm): $1,250 \pm 100$

Thickness: Adhesive paper - 80um/sheet

Release paper - 117um/sheet

Total Thickness: 13.00mm/pad (50 sheets)

Packing: 50 sheets/pad, 20pads/box

Size

1)330mm x 240mm (Adhesive area: 330 x 180mm)

2)165mm x 240mm (Adhesive area: 165 x 180mm)

- Release paper
- Adhesive
- Base paper

Adhesive Free on one end
Easier to peel-off

Full Adhesive
Improved dust visibility

• Holder for DCR-Pad

M29-C-001

Packing

- 1)50 sheets/pad, 5 pads/inner box, 5 inner boxes/outer carton
- 2)50 sheets/pad, 10 pads/inner box, 5 inner boxes/outer carton

Total weight: 860g, 430g/pad, 24.5 kgs/carton

● Steam Cleaner

Features

- Convenient and effective mat cleaning.
- Can be used with/without detergent.
- Detergent, spray and squeegee are available.

● Paper Adhesive roll

The Paper Adhesive Roll is made of Eco-friendly water based adhesive and special paper materials. It is designed to remove particles on the sensitive surface primarily such as PCB board. To prevent static electricity generated when the roll is unrolled or removed from various objects, the adhesive and paper have an antistatic function. One of the remarkable feature is that the softness is much higher than PP and PE. Thus, it can apply to all of the uneven surfaces. Additionally, the special treatment paper helps to generate less particles when it torned.

Features

- Water based adhesive.
- Environment-friendly Products.
- Almost no dust.
- Anti-static function
- No adhesive residue

- Water based adhesive
- Specially processed paper
- Silicone

Item	Adhesive Material	Adhesive power	Thickness(mm)	Width(mm)	Length(m)	Sheet	Tensile strength(g/f)	Elongation(%)	Surface resistance	Core

6 Stationery

• Polstar Clean Paper

Polstar Clean Paper is specially designed for writing, printing and photo-copying machine in Cleanroom environment. Through polymerization process, fiber lint and particulates are tightly bound each other. This will decrease electro-static buildup and will eventually minimize scrap rate of copier. Polstar Clean Paper provides the variety of colors, sizes and weights.

Features

- Low Talc
- Recyclable
- Double packing in cleanroom environment
- Ultra-low particle generation, extractable chemicals and metallic ion content
- High opacity and durability
- High tear and tensile strength
- Smooth feeding and superior toner adherence in laser printers and PPC copiers
- Clear writing
- Various colors, sizes and weights are available

• Polstar Clean Paper (EC Type)

Newly developed Clean Paper to meet the requirement of price-oriented customers

Features

- Low Talc
- Recyclable
- Single packing in cleanroom environment
- Ultra-low particle generation, extractable chemicals and metallic ion content
- High opacity and durability
- High tear and tensile strength
- Smooth feeding and superior toner adherence in laser printers and PPC copiers
- Clear writing
- Various colors and sizes are available

• TF Clean Paper

Features

- Talc Free
- Recyclable
- Double packing in cleanroom environment
- Ultra-low particle generation, extractable chemicals and metallic ion content
- High opacity and durability
- High tear and tensile strength
- Smooth feeding and superior toner adherence in laser printers and PPC copiers
- Clear writing
- Colors: White, Light blue

6 Stationery

• Clean Roll Paper

M01-S-000

Recyclable
Various colors and weights are available
Core dia.: 2", 3"(76mm)
Width: 30mm~1600mm
Length: 30m~10,000m

• Clean Notebook

M05-S-000

Features

- Easy to write on
- Tear resistance
- High-density polyethylene cover, plastic spirals and durable clean paper
- Translucent cover allows the reader to easily identify the notebook's contents
- Spiral design allows the notebook to lie flat and stay opened

Line: Ruled, Checked
Custom sizes are also available

• Continuous Printing Paper

M04-S-000

Item	Weight(gsm)	Size (mm)		Packing
Clean Paper	72, 80, 100, 250	A3	420 x 297	250 sheets/pk, 5 pkcs/ctn

* Other weights, colors and sizes are also available under minimum production q'ty.

Clean Notebook	72, 80	Spiral / A4	210 x 297	50 sheets/book
		Spiral / A5	210 x 148	50 sheets/book
		Spiral / A6	105 x 148	50 sheets/book
		Stapler/A4	210 x 297	30 sheets/book
		Stapler/A5	210 x 148	30 sheets/book

* Other weights, sizes and sheets are also available under minimum production q'ty.

- Made of polstar clean paper
- Strong and durable
- Suitable for Cleanroom environment

6 Stationery

• Security Paper, Printer and Gate

Structure of Security Solution

Security Paper

Security paper is made of micro wire materials which are virtually impossible to remove. Moreover, it has the same thickness as plain paper. It is designed to trigger detection alarms at the security gate when any confidential document is attempted to be carried out.

Printer Sensor

The self-developed mini security sensor embedded in any multi-function printer allows for a relatively low initial cost by ensuring single sensor installation on a printer with two or more trays. Any regular printer can be transformed to a security printer by simply installing the security sensor. The security sensor embedded in the printer only works with the security paper and rejects regular paper without printing.

Security Gate

This gate is custom engineered with the security paper to maximize detection sensitivity to protect your important documents from information theft.

How much important Hardcopy Document Security?

Data Leakage Status

Data Source : Japan Network Security Association

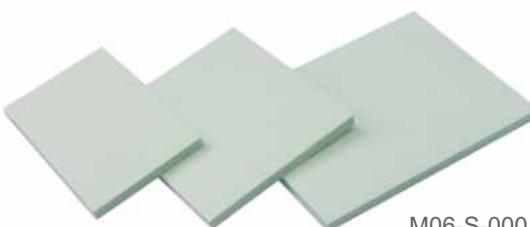

Stakeholder cases take up 80% of information leakage

Hard Copy Document take up 50%

Hard Copy Document Leakage Cases

- National Security Agency(NSA) contactor put the printed top-secret document in her stockings and later gave it to news outlet – The Washington Post. June 2, 2016
- Former FBI has been charged for leaking secret document to news outlet. He allegedly continued cutting, pasting screen shots and printing some out – Star Tribune. March 29, 2018
- Fund operation document leaked – Special Economics. February 2, 2017

● Clean Memo Tag

M06-S-000

- Designed with special adhesive
- Light weight
- No extractables left behind
- Easy to write on
- Ideal for simple notes and writing reminders

● Clean Label

M07-S-000

- Polstar Clean Label is for the purpose of memo, data writing or bar coding on wafer carrier or box.
- Particle-free PP film with acrylic glue minimizes contamination and is free from unwanted adhesive residue after the label is removed.
- As the film is also chemical treated for bar code printing, the recognition error from the readers will be minimized.
- Custom sizes are also available.

M08-S-000

● ESD Clipboard

M11-S-001(A4)

Material: Body- Static Dissipative PMMA(Acrylic) / PC
Clip- S/Steel+Plastic
Size: A4, A5
S/R: 10e6 ~ 10e8 ohm

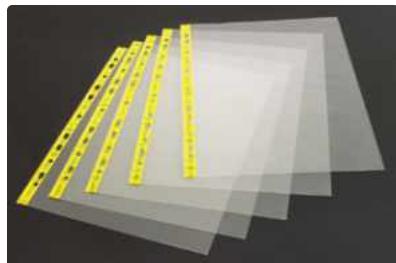

M11-S-003

Material: Leather
Size: A4
Color: Black
Surface Resistance: 10E5~10E8 ohm

6 Stationery

• ESD Clear File

Material: PP
Size: A3, A4, B4, etc.
Thickness: 0.05mm
S/R: 10e9 ~ 10e11 ohm

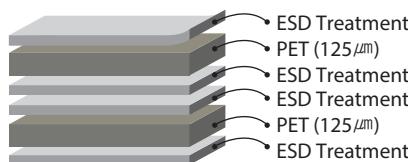

• ESD Document Holder

M14-S-004(A4)

Features
 • Protect documents, especially thinner files
 • Cleanroom compatible
 • Open 2 ways (top & side)

Material: PET
Size: A4
Thickness: 0.2mm
S/R: 10e5~10e7 ohm (both side)

M14-S-007

Material: ABS
Color: Black
Surface Resistance: 10E5~10E8 ohm

M14-S-008
M14-S-009

Material: PETG
Size: A4
Back width: 20mm/30mm
Color: Black
Surface Resistance: 10E5~10E8 ohm

M14-S-010

Material: ABS
Size: A4 (3 Layers)
Color: Black
Surface Resistance: 10E5~10E8 ohm

M14-S-011

• ESD Laminating Film

M13-S-004

M13-S-006

Features

- Good Transparency
- 2 Colors
- Good performance in Laminating
- Semi-permanent surface resistivity
- Film in roll type is also available on request

Applications

- Protect documents with ESD laminating.

Physical properties

● ESD Cleanroom Pen

M39-S-001(Black)
M39-S-002(Blue)
M39-S-003(Red)

Colors: Black, Blue, Red
Packing: 2pcs/bag, 100bags/case

Features

- Barrel is made of HDPP(high-density polypropylene)
- Low Sodium, Chloride and Heavy Metal used Ink
- Non-smearing permanent Ink
- Double poly packed with cleanroom bags in Class 100(ISO 5)
- Low outgassing and particulate generation material is used
- Rectangular clip design

● ESD Pen

M30-S-001

Material: ABS
Color: Black
Surface Resistance: 10E5~10E8 ohm

● ESD Pen Stand

M31-S-001

Material: ABS (Plastic Part)
Color: Black (Plastic Part)
Surface Resistance: 10E5~10E8 ohm

● ESD Cutter

M32-S-001

Material: ABS (Plastic Part)
Color: Black
Surface Resistance: 10E5~10E8 ohm

● ESD Puncher

M28-S-001

Material: ABS (Plastic Part)
Color: Black (Plastic Part)
Surface Resistance: 10E5~10E8 ohm

● ESD Stapler

M29-S-001

Material: ABS
Color: Black
Surface Resistance: 10E5~10E8 ohm

● ESD Tape Cutter

M36-S-001

Material: ABS
Diameter: 25mm, 75mm
Color: Black
Specification: Tape inner
Surface Resistance: 10E5~10E8 ohm

M36-S-002

Handheld type
Material : ABS
Size : 2"/2.5"
Color: Black
Surface Resistance: 10E5~10E8 ohm

6 Stationery

• ESD Telephone

• ESD Scanner

M37-S-001

Material: ABS (Plastic Part)
Color: Black
Surface Resistance: 10E5~10E8 ohm

• ESD Clip

M33-S-001

Material: Plastic
Size: L, M
Color: Opaque
Surface Resistance: 10E5~10E9 ohm

• ESD Calculator

M23-S-001

Material: ABS
Surface Resistance: 10E5~10E8 ohm

• ESD Ruler

M26-S-001

Material: Plastic
Color: invisible
Surfaceification: 30cm
Surface Resistance: 10E5~10E8 ohm

• ESD Scissors

M27-S-001

Material: ABS(Plastic Part)
Color: Black(Plastic Part)
Surface Resistance: 10E5~10E8 ohm

• ESD Display Rack

M34-S-001

Wall Mounting type
Material: ABS base+pp
Paper Size: 210*297mm
Color: Black, Black leaflets
Surface Resistance : 10E7 ~ 10E9 ohm
Leaf: 10 pockets

M34-S-002

Desktop type
Material: ABS base+pp+metal
Paper size: 210*297mm
Color: black stand, black leaflets
Surface Resistance : 10E7 ~ 10E9 ohm
Leaf: 20 pockets /40 sheets
Half moon handle
Can be rotate 360° by hand

6 Stationery

• ESD Cleanroom Bags

Features

- TPU material
- Surface Resistance: $10e4 \sim 10e6$ ohm
- Good durability and elasticity
- Wear, cold and oil resistance
- ECO friendly and no harmful to human body
- Expandable (backpack, cross bag)
- Adjustable shoulder straps
- Suitable for cleanroom and ESD environment

Backpack

300 x 410 x 150

L - 330 x 245

(Unit: mm)

7 Gloves

• High Tech Assembly Gloves

Our High Tech Assembly Gloves are Polyamide Fiber Gloves, which are popular for their high strength, durability, and comfortability.

Features

- Polyurethane coating provides super grip and abrasion resistance.
- Polyurethane coating eliminates fingers fatigue associated with finger cots and allows handling of very small parts without fingerprint contamination.
- Protects handling products from sweat and dust.
- Optimum comfortability and dexterity
- Low lint
- Knit wrist, Seamless
- Oil resistant (NBR)

Applications

- General assembly
- Electronics, Component handling
- Light engineering work
- Maintenance or micro-mechanical tasks
- Pharmaceutical processing
- Inspecting precise parts, articles, etc.
- Delicate and precise operations, such as assembly jobs in electronic, semiconductor, micro-processor and compact disk lines.

● Static Control Gloves

Features

- Made of static control carbon yarn mixed nylon(ESD) and copper yarn mixed nylon(Conductive)
- Excellent when tactile sensitivity is important in handling small parts
- Suitable for the places where cleanliness and ESD control is required
- Provides protection to operator's hands and products being handled
- Good elasticity, ventilation and minimizing sweat buildup
- Good grip
- Stable ESD properties

Applications

- Good for handling electronic instruments, circuit boards and components.
- Prevent products from miscellaneous disturbances or accidents caused by static electricity.
- Antistatic treated surface semiconductors, micro-processors and compact disks.
- Assembling LSI, VLSI, Semiconductors as well as computers and precise instruments

7 Gloves

Seamless Gloves

Seamless Gloves is breathable Gloves. It consists of polyester knitted fabric and laminated with breathable polyurethane film, which combines friendly feel of fabric with the protection of elastomer. Its moisture permeability protects operators from rash and harsh chemicals.

Features

- Seamless high frequency welding instead of sewing
- Having antistatic properties after wearing
- Can operate smart phone touch screen with your gloves on
- Laundered with 18Mohm deionized water twice and packed in Cleanroom
- Excellent comfortability
- No need to wear inner gloves
- Water proof and vapor permeability
- Prevents operators from skin irritation and eczema
- Improve work efficiency
- Reusable after washing

Materials

- Polyurethane Coated Knitted Polyester
(Inner layer - Knitted Polyester / Outer layer - Polyurethane)

Applications

- Pharmaceutical, Medical and Hospital Industries
- Semiconductor and Electronic Industries

- Ultra Pure PE Gloves

M31-G-001

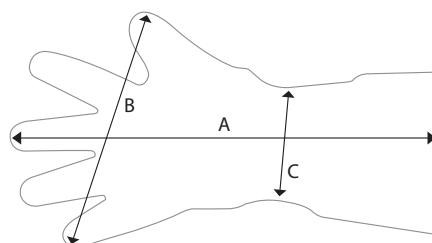

Ultra Pure PE Gloves(UPPG), made of additive free pure polyethylene, are high pure and clean Gloves, which are suitable for a Polysilicon manufacturing process.

Originally, UPPG have been developed to meet the high cleanliness level of polysilicon manufacturing industry.

The main application of this glove is to handle pure chunk of polysilicon in the polysilicon manufacturing process or it can be used in the process of monocrystal ingot in wafer factories as well.

** What is Polysilicon?

Polycrystalline silicon also known as Polysilicon is a material consisting of small silicon crystals.

The main component of Polysilicon is Si. Generally, the applications of Polysilicon are for a key material of solar panels and semiconductor, which is divided by the grade of the purity. The purity of 6N(99.9999%) is for a solar energy industry and 11N(99.99999999%) is for a semiconductor industry.

Polysilicon is a key component of solar panel construction and wafer in semiconductor. When it comes to solar panel construction, it plays a key role to convert light energy to electric energy in solar cells.

** Major Polysilicon Manufacturers

Hemlock Semiconductor (USA)

OCI (Korea)

Wacker Chemie (Germany)

GCL-Poly(China)

REC(Renewable Energy Corporation ASA) (Norway)

Tokuyama (Japan)

MEMC Electronic Materials (USA)

LDK Solar (China)

KCC (Korea)

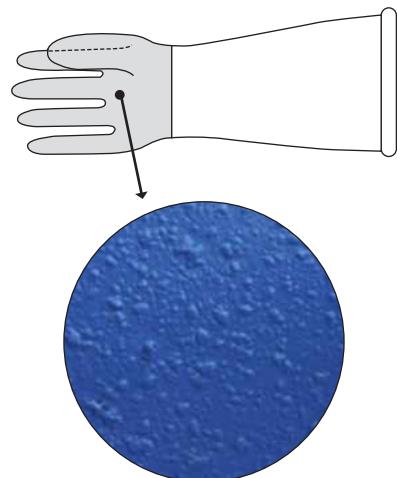

Hankook Silicon (Korea)

M02-W-027 (Inox-1050)
M02-W-028 (Inox-1080)

9" x 9", 100 pcs/bag, 10 bags/ctn

Features

- Excellent wiping without scratches
- Extremely low non-volatile residues and ions
- Excellent absorbing capacity
- Suitable for sensitive surface by its soft texture
- Double packed in Class 10~100 Cleanroom

Applications

- Sophisticated products
- Digital camera lens
- Printer drum
- Optical product
- TFT-LCD, PDA

Differences between microfiber wipers and typical polyester wipers

Materials

Microfiber wipers: microscopic polyester(70~80%) and polyamide(20~30%) fibers
Polyester wipers: 100% polyester

Touch

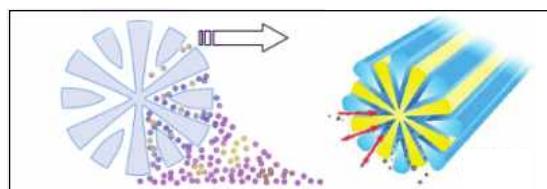

The touch of microfiber wipers compare to normal polyester wiper is much soft

Absorbency

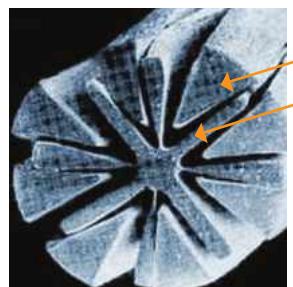

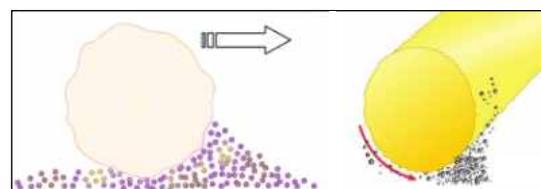

Microfiber wiper has better absorbency thanks to its unique fiber structure

- Enlarged cross section of single fiber

① Well-split microfiber

② Normal polyester fiber

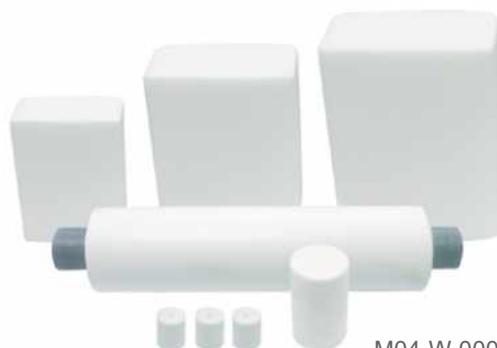

Polyamide
Polyester

8 Wipers

• PVA Sponge Wiper

M04-W-001

M04-W-000

The Polstar PVA Sponge is a water-friendly wiper created by a foaming method using the material of PVA (Poly Vinyl Alcohol). It has continuous open-cell structure, high absorbency, durability and good resistance to chemicals. Thanks to its characteristic properties, the PVA sponge wiper is widely used in various industrial fields as well as in Cleanroom, such as PCB, Glass, Mirror, TV brown Tube, Optical instrument and many others. Typical sizes are 2mm x 9"x9", 2mm x 12"x 12", but a block type or a roll type PVA wiper is also available on request.

88

Wipers

Features

- Neither fluff nor particle is generated.
- Excellent hydrophilic material.
- Excellent elasticity in wet conditions.
- High absorbency.
- Good chemical resistance
- Open-cell structure
- Antistatic function in wet

Packing

- 2mm (T) x 9" x 9": 10sheets/pack, 20packs/ctn
- 2mm (T) x 12" x 12": 10sheets/pack, 40packs/ctn

• Non-Woven Wiper

M05-W-000

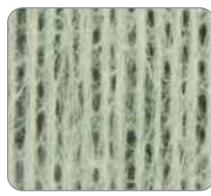

Features

- Made of durable synthetic fiber
- High absorbency
- Low particle generation and non-volatile residues

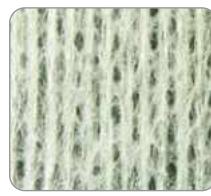

Applications

- Pre-cleaning for spare parts of equipment
- Equipment
- Cleanroom wall
- Cleanroom access floor
- Use for Class 100 - 10,000 widely

9 Packaging Bags and Film

Electro Static Discharge(ESD) is nothing new, but its effect on electronic components and devices is serious if it is not properly controlled. Uncontrolled ESD causes not only partial damage, but also sometimes destroys electronic components and devices totally. Together with controlling of ESD, moisture is also essential to be controlled for sensitive devices or components.

Apart from personal grounding, sensitive goods should also be well protected from ESD and moisture during transportation and storage.

There are several types of packaging bags in the market. The most important thing is to select a suitable bag for each application.

● Static Shielding Bag(SSB)

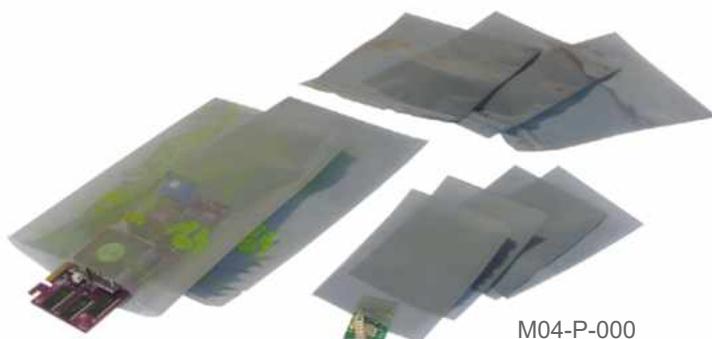

SSB is manufactured by depositing a thin metal coating, like aluminum over an antistatic polyester film substrate. This metalized layer protects the devices or the components in the bag from electrostatic fields.

According to the position of the metalized layer, there are two types of static shielding bags, "Metal-In" and "Metal-Out", in the market.

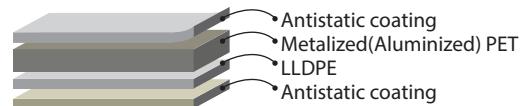

The metal-in bag or buried metal shielding bag is the most commonly used and recommended for packaging of static-sensitive components. It also tends to be superior to the metal-out bag in durability and cost.

The metal-out shielding bag also protects the devices in the bag against static-induced damage. As the metal layer is closer to the outside surface, this bag has lower ESD reading than the metal-in bag, which can be important in some applications.

90 Our SSB is the metal-in type, which has the metalized layer inside.

Thickness: 55~200 μm (Common: 75 μm)
Maximum width: 1,250mm
S/R: 10e9~10e11 ohm

● Conductive Black PE Bag(CBPB)

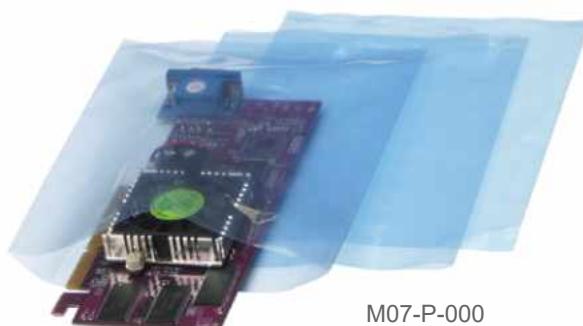

- Cost-effective bag
- Low surface resistance

Thickness: 40~200 μm (Common: 80 μm , 100 μm)
Maximum width: 700mm
S/R: 10e3~10e6 ohm

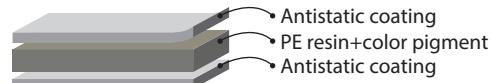

9 Packaging Bags and Film

• Antistatic PE Bag(APB)

- Cost-effective bag
- Suitable for less sensitive components for ESD
- Color: Pink, Blue, etc.

Thickness: 40~200 μm (Common: 50 μm , 80 μm)
Maximum width: 1000mm
S/R: 10e9-10e11 ohm

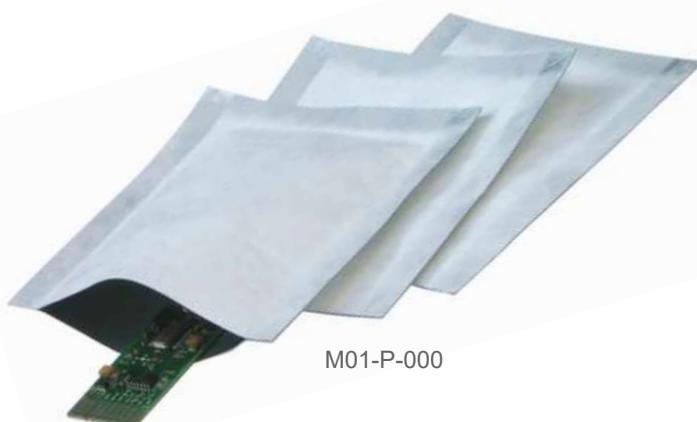

• Moisture Barrier Bag(MBB)

It is essential to keep Surface-Mount Devices (SMDs) dry from manufacturing point to the time of reflow soldering. Moisture Barrier Bag, also known as Vapor Barrier Bag, is made by multiple layers of plastic and aluminum that control moisture vapor leakage.

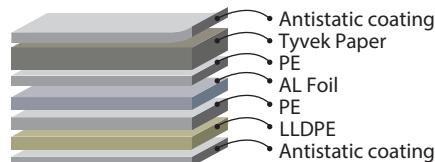

Basically, there are 3 kinds of Moisture Barrier Bags (MBBs), Tyvek MBB, AMBB and ANMBB, in the market. The key factor of moisture barrier function of the bag is a metal layer, like thickness of the foil layer, foil or metallized, etc., but thickness or material of other layers will partially affect the quality of MBB as well.

Tyvek Moisture Barrier Bag(Tyvek MBB)

Tyvek MBB is ideal for moisture sensitive devices or components, and especially is suitable for sharp-shape components thanks to its excellent puncture resistance.

Thickness: 307 μm , 247 μm
MVTR*: < 0.02 g/100 sqinch/24h

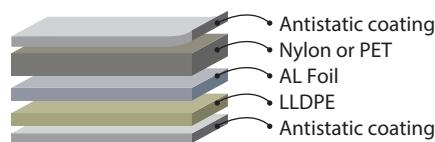

Aluminum Moisture Barrier Bag(AMBB)

AMMB is a good choice for moisture sensitive devices and components. Depending on the products stored in the bag and the periods of storage, you have several selections on AMMB by adjusting the total thickness of the bag, the thickness of AL foil layer, etc.

Thickness: 62~200 μm (Common: 100 μm , 150 μm)
Maximum width: 1,250mm
MVTR*: < 0.02 g/100 sqinch/24h

9 Packaging Bags and Film

Aluminized Moisture Barrier Bag(ANMBB)

ANMBB is a new technology for barrier materials, which reduces material cost. Aluminum is vapor-deposited onto polyester film or nylon film. This cost effective bag comparing to AMBB is suitable for medium to short term dry-packaging users.

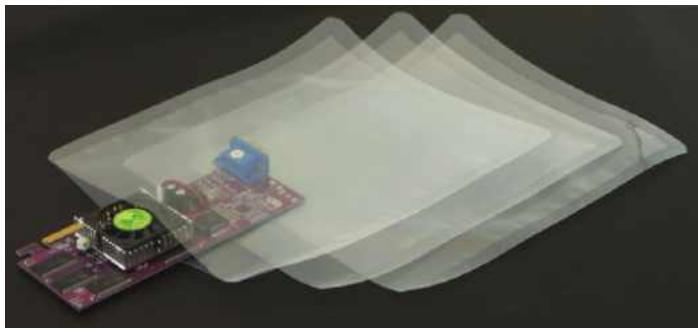

M03-P-000

Thickness: 62~200 μm (Common: 90 μm , 100 μm)
Maximum width: 1,250mm

Transparent Moisture Barrier Bag(TMBB)

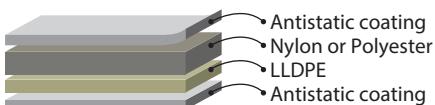

TMBB has no metal layer, but it can be used for less moisture sensitive devices and this bag can be a good choice for foods packing too, which requires clean and vacuum properties.

M05-P-000

- Suitable for less moisture sensitive devices
- Suitable for food industries
- Visible bag inside
- No metal layer, but good moisture resistance and vacuum properties.

Thickness: 62~200 μm
Maximum width: 1,250mm

● Packaging Film

All types of pre-laminated packaging films, thicknesses and sizes are available.

Item code	Product	Width(mm)	Length/roll(m)	Thickness(μm)
M08-P-000	Film for TyvekMBB	200~900	1000	247-307
M09-P-000	Film for AMBB	200~1200	1000	62-200
M10-P-000	Film for ANMBB	200~1200	1000	62-200
M11-P-000	Film for SSB	200~1500	1000	55-200
M17-P-000	Film for TMBB	200~1200	1000	62-200
M12-P-000	Film for CBPB	50~700	1000	40-200
M13-P-000	Film for APB	50~1000	1000	40-200

*Thickness units

Mil - 0.001 inch, ex) 3 mils = 0.003 x 25.4mm = 0.0762mm = 76.2 microns

Micron - 1/1,000,000m (1/1,000mm = 0.001mm), ex.) 100 microns = 100/25.4 = 3.93mils

MM - 0.15mm = 150 microns

*MVTR

The Moisture Vapor Transmission Rate (MVTR) is the rate that water vapor passes through a specific area of barrier material. MVTR is measured in grams of water vapor per 100 square inches of barrier per 24 hours (g/100 in.2/24 h).

EIA 583 Packaging Material Standards for Moisture-Sensitive Items defines a Class 1 barrier as having an MVTR of <0.02 g/100 in.2/24 h. A Class 2 barrier is set at <0.08 g/100 in.2/24 h.

• Humidity Indicator Card(HIC)

HIC allows fast visual inspection of the Relative Humidity(RH) in sealed packaging and containers. As the humidity increases, the chemically impregnated spots will be changed traditionally from blue through lavender to pink(Cobalt-HIC), blue to pink(CDF-HIC), brown to green(CB-HIC), yellow to green(CF-HIC) and green to violet(MF1-HIC). Our HICs have 3 spots or 6spots, but we also have a one spot type. It contains 3 spots, but only one spot is chemically impregnated and other two spots are just printed with reference colors for "OK" and "NG"(not good) so that user can easily check if it is failed or passed according to acceptable preset limit(ex. Semiconductor -10% RH, PCB/LED – 30% RH, etc.) in each industry.

We also have a plug type in round shape different from most other square designs in the market. Especially, if we use it with a specially designed plug case, it will be easy and effective to check the humidity conditions inside of the bags without opening if we use it with a specially designed plug case.

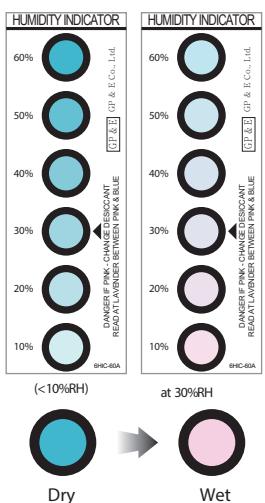

Most recently, we have developed a twin type, which is another innovative and unique concept, to absorb price-oriented customers. As you can cut each HIC into two by simply folding the card a couple of times and tearing it along pre-cut dot lines.

Features

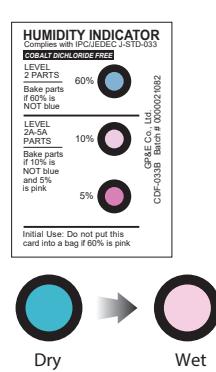

- Eco-friendly products
- Various types and designs(custom sizes and designs are also available on request)
- Meet MIL-I-8835A&IPC/JEDEC J-STD-033B.1
- Indication of warning point(option)

Standard type(3 spots, 6 spots)

10 Walls & Partitions

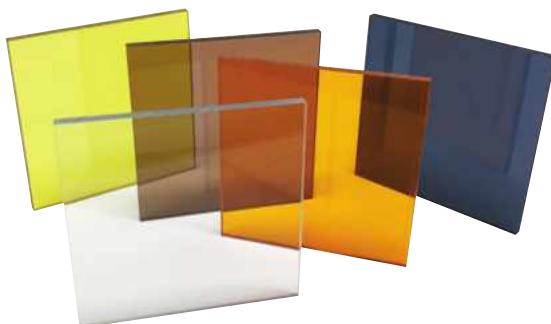

• Polstar Static Dissipative Plate

Polstar Static Dissipative Plate (PSDP) is made of clear plastic sheet coated on both sides providing semi-permanent surface resistance of $<10e9$ ohm, which will help to eliminate static electricity effectively. PSDP is ideal for the speedy decay of static charge without the creation of harmful arcing to the surface of vulnerable components. PSDP satisfies electrical and optical requirements providing superior abrasion, non-scratchable surface and chemical resistance.

PSDP is available with Polycarbonate (high temperature performance, fire resistance and outstanding impact resistance), PMMA (strong surface hardness and optimum clarity), PVC (good chemical resistance) and Aluminum Composition Panel to meet wide applications in each industry.

The new designed PSDP series are also applicable for the special applications of bending and bonding(Polycarbonate is not suitable for the bonding applications) without any crack on the surface and changing the surface resistance after bending.

PSDP is made in Korea. Its manufacturing site and R&D Center are located in Korea as well, those are certified to ISO 9001, Quality Management System and ISO 14001, Environmental Management System. We also have facilities for product development, technical service and quality monitoring and after-sales service.

Maintenance, Handling, Caution

- Recommendable storage conditions: less than 30°C, RH 40 - 60%.
- To avoid scratches on the surface, remove the protective film after PSDP has been machined.
- It is recommendable to have trials with test specimen to determine optimum settings before cutting or modification.
- Static dissipative coating must be removed from the surface to be glued.
- Isopropyl Alcohol (IPA) or alcohol based cleaning liquid is recommendable for cleaning.
- PSDP is not required to be cleaned with antistatic plastic cleaners.
- Loss of static dissipative performance will occur if excess scratching is concentrated in a particular area.
- If PSDP is treated with a polishing machine, the performance of static dissipative coating cannot be guaranteed.

10 Walls & Partitions

Polstar Static Dissipative Plate (PSDP) series are widely used in the following applications

- Cleanroom manufacturing area
- Semiconductor and Electronics / TFT / LCD manufacturing area and equipment
- Pharmaceutical and Biomedical processing areas
- Food processing area
- Explosive manufacturing areas
- Aerospace / Automobile related area
- Equipment viewing windows and doors
- Equipment enclosures and covers
- IC chip conveyor systems
- Dot placement machine
- Stencil printing machine
- Wafer handling equipment
- Desiccator cabinets
- Transport boxes
- Perimeter glazing
- Transparent room partitions
- Glazing panels for mini-environment and pass-thru units
- Laminar flow applications
- Portable cleanroom panels
- Ceiling panels
- Mini-environment panels
- Microbiology filling table covers
- Sterile filling station panels
- Barrier system panels
- Insulator unit covers
- Machinery guards
- Separator panels
- Templates

10 Walls & Partitions

• Polstar PVC Curtain Film

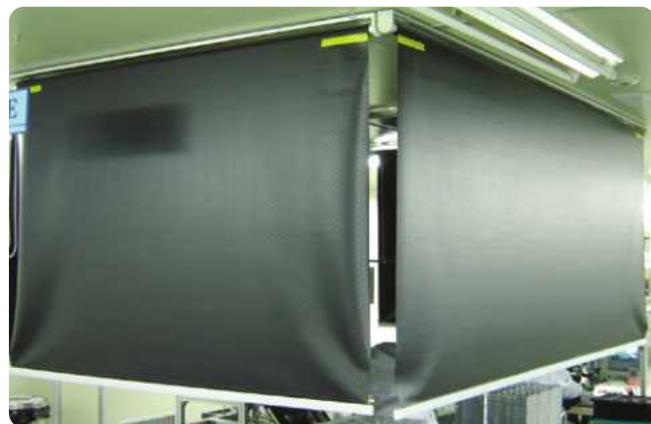

Polstar PVC Curtain Film is flexible transparent film with ESD control properties, which is made of durable PVC (PolyVinyl Chloride). This soft PVC film is easily jointed by high frequency welding. Its ESD control properties, that generate much less friction electrostatic charge, last long until worn-out. Polstar PVC Curtain Film is widely used as flexible partitions, softwalls, door curtains, covers for equipment, portable windows, etc. in many areas, such as Cleanrooms, laboratories, inspection, assembly, electronics, printing, painting, precision tooling, pharmaceutical, medical, food processing and so on.

Features

- Antistatic, static dissipative or conductive
- Extremely low electrostatic generation
- Dust and particles are not accumulated
- Clear transparent for good visuality
- Not tore easily, durable and long lasting
- Flexible and soft for efficient production
- Conductive print are not removed easily
- Various thicknesses and sizes are available
- Individual carton packing in roll
- OEM brand can be printed on request

Applications

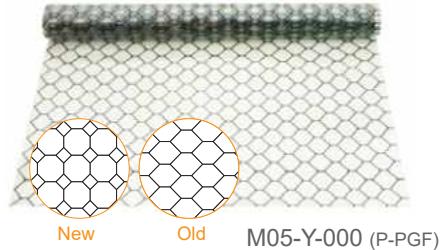

- Door strip, softwall, partition, curtain in Cleanroom
- Portable window and partition
- Precision equipment and machine cover
- Shielding and blocking partition
- Reduction of noise
- Protection from insects
- Screen door or window
- Reinforcement of existing window or partition
- Reduction of harmful ultra violet ray
- Other applications to control electrostatic problem

10 Walls & Partitions

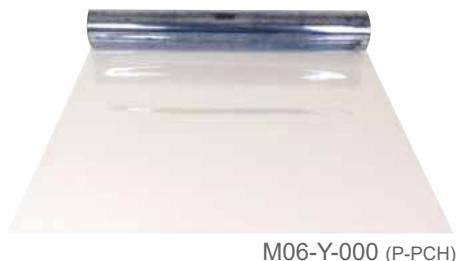

P-PGF (Polstar-PVC Grid Curtain Film)

Specially formulated conductive carbon printed on normal transparent PVC film in grid. The Surface resistance of the conductive carbon print is $10e4-10e6$ ohms. This model is the most widely used thanks to its economical cost.

P-PCH (Polstar-PVC Clear Curtain Film, Homogeneous Type)

Homogeneous type of antistatic transparent PVC film is made of antistatic compounded PVC, not antistatic coated material. This homogeneous PVC film is all antistatic on both sides and its ESD control properties remain permanent. This shows volume resistivity as well as surface resistivity because of homogeneous antistatic constitution. The surface resistance is $10e8-10e10$ ohms and the volume resistance is $10e7-10e8$ ohm.

P-PGB (Polstar-PVC Grid Opaque Black Curtain Film)

This is not homogeneous antistatic constitution, but specially formulated conductive carbon printed on black PVC film in grid. The surface resistance of the conductive carbon print is $10e4-10e6$ ohm and the base film is opaque in black. This is good recommendation for shielding screen effect with conductive ESD control properties.

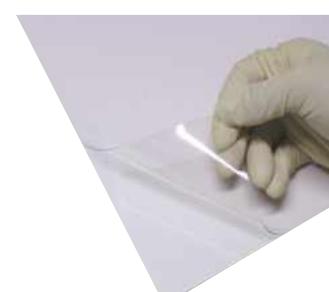

P-PUH (Polstar-PVC UV Clear Curtain Film, Homogeneous Type)

Homogeneous yellow tinted antistatic PVC film for the protection of harmful ultra violet ray. This orange tinted film is UV protection treated and the base film is antistatic of which surface resistance is $10e8-10e10$ ohm. This is to absorb ultra violet rays and not to accumulate dust and particle by eliminating of electrostatic.

P-PAH (Polstar-PVC Clear Adhesive Curtain Film, Homogeneous Type)

This homogeneous antistatic transparent film has adhesive layer. After removing of the protection film, this can be adhered to any insulated walls, windows, partitions or other materials that might have problem of ESD control. This homogeneous antistatic transparent film reduces higher electrostatic generation and protects from accumulation of dust and particles.

P-PBH (Polstar-PVC Opaque Black Curtain Film, Homogeneous Type)

Homogeneous black antistatic film. This is opaque type in black for shielding screen effect. The surface resistance is $10e8-10e10$ ohm. This is mainly for the application of visual protection.

P-PGG (Polstar-PVC Grid Opaque Black Curtain Film, Both sides)

Specially formulated conductive carbon printed on both sides of black PVC film in grid. The surface resistance of the conductive carbon print is $10e4-10e6$ ohm on both sides and the base film is opaque in black.

10 Walls & Partitions

• P-PSF (Polstar-Strip Door Curtain Film)

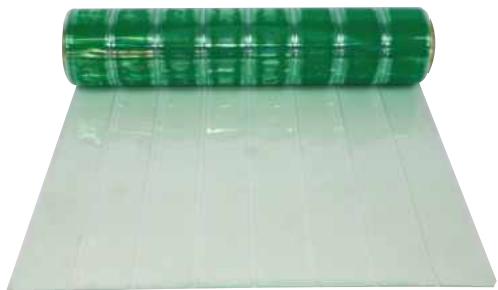

Polstar Strip Door Curtain Film is recommendable to be installed at the gates or the entrances of factories that are frequently opened and closed. It saves energy by keeping the temperature of the factories. It also prevents wind, insects and any foreign materials from coming inside of the factories. General purpose of strip door curtain film, cold resistant strip door curtain film, anti-insect strip door curtain film and anti-static strip door curtain film are available.

M16-Y-000 (P-PSF)

• P-PFF (Polstar ESD Folding Door Film)

Homogeneous antistatic foldable film is suitable to make clean booths, soft partitions, walls, doors, etc. The standard size is 1.35mm(T) x 1000mm(W) x 12m(L) and there are 8 folding lines in 1000mm width all the way to the length direction. Two colors, greenish clear and yellowish clear, are available.

M21-Y-000 (P-PFF)

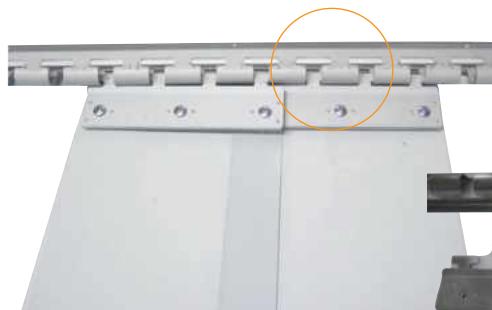

• Accessories for P-PSF

• Conductive Rope

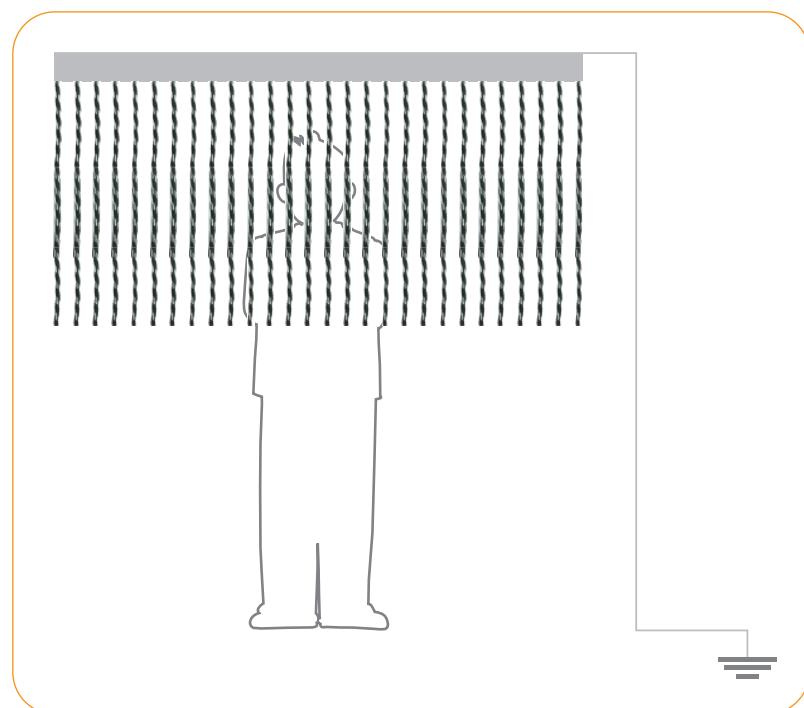

M14-Y-000

Color: Black & White mixed
Composition: Polypropylene - 93%
 Stainless fiber - 7%
Weight: 9 grams/meter
Dia: 7mm
Surface Resistivitance: 10e3~5 ohm
Packing: 100 yards/hank

This item is designed to make a blind curtain for grounding path of static charges built up on human body and transport equipment. It is quick and easy way to remove the static charges by simple touch of the ropes.

11 Tapes

• Marking Tapes

Marking Tapes have mainly 3 different kinds, which are ESD Marking Tape, ESD Marking Tape with Printings and ESD Floor Marking Tape. All of them have ESD properties on both adhesive and back sides. They barely generate very low particles by adopting plastic core and lint free film.

Applications

- Indication of "ESD Protected Area", "ESD Controlled Area", "ESD Safe Area"
- Color coding
- Safety Markings

ESD Marking Tape

PVC tape with antistatic treatment on both sides

M03-T-000 (PT-CMT)

Color: Green, Blue, Red, Yellow, White
Surface Resistance: 10e7~10e9 ohm
Thickness: 140 μm
Size: 1/2", 1", 3/4", 2", 4" x 33m/roll, 1,000mm x 33m(Jumbo roll)
Packing: 25mm x 33m / 60rls, 50mm x 33m / 30rls

- Antistatic treatment
- PVC(110 μm)
- Antistatic treatment
- Antistatic acrylic adhesive(30 μm)

103
Tapes

ESD Marking Tape with Printings

PET laminated PVC tape with printings and antistatic treatment on both sides

M04-T-000 (PT-CMP)

Color: Green, Blue, Red, Yellow, White, Black&Yellow
Surface Resistance: 10e7~10e9 ohm
Thickness: 145 μm
Size: 1/2", 1", 3/4", 2", 4" x 33m/roll, 1,000mm x 33m(Jumbo roll)
Packing: 25mm x 33m / 60rls, 50mm x 33m / 30rls

- Antistatic treatment
- PET(15 μm)
- ESD logo printed PVC (100 μm)
- Antistatic treatment
- Antistatic acrylic adhesive(30 μm)

ESD Floor Marking Tape

PET laminated PVC printed tape with ESD Symbol and "ESD Protected Area"

M05-T-000 (PT-EMT)

Color: Black printing on yellow
Surface Resistance: 10e7~10e9 ohm
Thickness: 145 μm
Size: 50mm x 33m/roll
Packing: 50mm x 33m / 30rls

- Antistatic treatment
- PET Film(15 μm)
- Printed PVC Film (ESD symbol and "ESD Protected Area") (100 μm)
- Antistatic treatment
- Antistatic acrylic adhesive(30 μm)

11 Tapes

• ESD Packing Tapes

ESD Packing Tapes were developed to protect static sensitive products from static electricity generated by triboelectricity when they are unrolled or removed from various objects our ESD packing tapes relatively generate very low static voltage while normal tapes generate about over 1KV to 9.5KV to 14KV under the same conditions.

Applications

- Bundle of DIP IC Tube
- Seal Static Shielding Bag
- Pack Conductive IC Tray
- Pack Wafer Carrier
- Attach a Note in Cleanroom
- EMI Shielding
- Holes or Connector Pins
- Covers for External Plugs

Antistatic Utility Tape(Standard)

Metallized PET film with antistatic acrylic adhesive

M01-T-000 (NAT-801)

Surface Resistance: 10e7~10e9, Back-10e11~10e12 ohm
Thickness: 50 μ m
Size: 1/2", 1", 3/4", 2" x 50m/roll, 1200mm x 50m(Jumbo roll)
Packing: 25mm x 50m / 100rls, 50mm x 50m / 50rls

- Metallized PET(25 μ m)
- Antistatic treatment
- Antistatic acrylic adhesive(25 μ m)

104

Tapes

Antistatic Utility Tape(ESD on both Sides)

Metallized PET film with antistatic acrylic adhesive

NEW

M35-T-000 (NAT-801)

Surface Resistance: 10e7~10e9, Back-10e7~10e9 ohm
Thickness: 50 μ m
Size: 1/2", 1", 3/4", 2" x 50m/roll, 1200mm x 50m, 100m(Jumbo roll)
Packing: 25mm x 50m / 100rls, 50mm x 50m / 50rls

- Antistatic treatment
- Metallized PET(25 μ m)
- Antistatic treatment
- Antistatic acrylic adhesive(25 μ m)

Antistatic Utility Tape(Standard/Halogen free)

Metallized PET film with antistatic acrylic adhesive

NEW

M38-T-000 (NAT-801)

Surface Resistance: 10e7~10e9, Back-10e11~10e12 ohm
Thickness: 50 μ m
Size: 1/2", 1", 3/4", 2" x 50m/roll, 1200mm x 50m(Jumbo roll)
Packing: 25mm x 50m / 100rls, 50mm x 50m / 50rls

- Metallized PET(25 μ m)
- Antistatic treatment
- Antistatic acrylic adhesive(25 μ m)

Antistatic Utility Tape(ESD on both Sides/Halogen free)

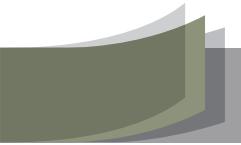

Metallized PET film with antistatic acrylic adhesive

NEW

M39-T-000 (NAT-801)

Surface Resistance: 10e7~10e9, Back-10e7~10e9 ohm
Thickness: 50 μ m
Size: 1/2", 1", 3/4", 2" x 50m/roll, 1200mm x 50m, 100m(Jumbo roll)
Packing: 25mm x 50m / 100rls, 50mm x 50m / 50rls

- Antistatic treatment
- Metallized PET(25 μ m)
- Antistatic treatment
- Antistatic acrylic adhesive(25 μ m)

11 Tapes

Antistatic Grid Tape

Metallized PET film with ESD symbol and carbon grid printing

M06-T-000 (PT-CGT)

Surface Resistance: 10e7~10e9, Back-10e8~10e9 ohm
 Thickness: 50 μm
 Size: 1/2", 1", 3/4", 2", x 50m/roll, 1000mm x 50m(Jumbo roll)
 Packing: 25mm x 50m / 100rls, 50mm x 50m / 50rls

- Carbon Printing
- Metallized PET(25 μm)
- Antistatic treatment
- Antistatic acrylic adhesive(25 μm)

ESD Control Tape

Cellulose based synthetic film with antistatic acrylic adhesive

M02-T-000 (NAT-803)

Surface Resistance: 10e8~10e9, Back-10e10~10e11 ohm
 Thickness: 55 μm
 Size: 1", 2", x 50m/roll, 600mm x 50m(Jumbo roll)
 Packing: 25mm x 50m / 100rls, 50mm x 50m / 50rls

- Cellulose film (30 μm)
- Antistatic acrylic adhesive(25 μm)

ESD Control Tape with Printings

Cellulose based synthetic film with antistatic acrylic adhesive & ESD logo printings

M26-T-000

Surface Resistance: 10e8~10e9, Back-10e10~10e11 ohm
 Thickness: 55 μm
 Size: 1", 2", x 50m/roll, 600mm x 50m(Jumbo roll)
 Packing: 25mm x 50m / 100rls, 50mm x 50m / 50rolls

- Cellulose film (30 μm)
- Antistatic acrylic adhesive(25 μm)

Antistatic Clear Tape

Antistatic transparent PET film with antistatic acrylic adhesive

M07-T-000 (PT-EPT)

Surface Resistance: 10e8~10e9, Back-10e7~10e8 ohm
 Thickness: 55 μm ± 5
 Size: 1/2", 1", 3/4", 2", x 50m/roll, 1000mm x 50m(Jumbo roll)
 Packing: 25mm x 50m / 100rls, 50mm x 50m / 50rls

- Antistatic treatment
- PET film (25 μm)
- Antistatic treatment
- Antistatic acrylic adhesive(30 μm)

11 Tapes

Antistatic OPP Tape

Antistatic treated OPP film tape with rubber adhesive

Features

- Keep semi-permanent antistatic properties
- Strong adhesive power
- Environment friendly material

Surface Resistance: 10e11~10e12, Back-10e7~10e10 ohm

Thickness: 67±5(Film: 40um)

Size: 1", 2", x 50m/roll, 1000mm x 50m (Jumbo roll)

Packing: 25mm x 50m / 100rls, 50mm x 50m / 50rls

- Antistatic treatment
- OPP (40 μ m)
- Antistatic rubber adhesive(20 μ m)

Antistatic OPP Tape with Printings

Antistatic treated ESD logo printed OPP tape with rubber adhesive

Features

- Keep semi-permanent antistatic properties
- Strong adhesive power
- Environment friendly material

Surface Resistance: 10e9~10e11, Back-10e9~10e11 ohm

Thickness: 67±5(Film: 40um)

Size: 1", 2", x 50m/roll, 1000mm x 50m (Jumbo roll)

Packing: 25mm x 50m / 100rls, 50mm x 50m / 50rls

- Antistatic treatment
- ESD Logo printed OPP (40 μ m)
- Antistatic rubber adhesive(27 μ m)

● Peeling Tape

Features

- Special purpose tape for peeling back grinding tapes for wafer
- Suitable for peeling of back grinding tape without damaging wafer
- Excellent peeling ability
- Two kinds of peeling tapes: rubber adhesive and hot melt adhesive types

Properties	Unit	PT-SHH	PT-ELH	PT-PRU
Film material	-	PET	PET	PET
Adhesive	-	Hot melt type	Hot melt type	Rubber adhesive
Film Thickness	μ m	25	50	50
Adhesive Thickness	μ m	50	50	30
Total Thickness	μ m	75	100	80
Adhesion	gf/25mm	2000	2200	2200
Applications	-	PE, PP B/G tape	EVA B/G tape	PE, PP B/G tape
Construction		PET film	PET film	PET film
		Primer	Primer	Rubber adhesive
		Hot melt Adhesive	Hot melt Adhesive	
Heat seal tempurature	°C	180~200	235	-
Heat seal pressure	kg/cm2	1~3	1~3	-
Heat seal time	sec	1~3	1~3	-
Size		25, 50, 75mm x 200m(or 300m)	25, 50, 75mm x 200m	25, 50, 75mm x 100m

11 Tapes

• Masking Tapes

HT PET Masking Tape

High temperature PET film with silicone adhesive

M12-T-000 (PT-PMT)

Features

- Heat resistance: 200°C

Applications

- Suitable for using as flash breaker tape in the Aerospace Industry
- Photo splicing tape for attaching film to Leader Card on all automatic photo developing and printing machine.

Color: Green

Thickness: 90 μm

Size: 10mm, 20mm, 25mm, 50mm x 33, 50m/roll,

750(710)mm x 33m / 1080(1040)mm(Jumbo roll)

Packing: 25mm x 33m / 60rls, 50mm x 33m / 30rls

• High temperature PET film (50 μm)

• Silicone adhesive(40 μm)

PET Masking Tape

PET film with silicone adhesive coating

M18-T-000 (PT-PST)

Features

- Heat resistance: 180°C

Applications

- JIG, PCB fixation
- Protect components or devices from foreign substances during SMT process.

Thickness: 65 μm

Color: Red, Green

Size: 10mm, 20mm, 25mm, 50mm X 50m/roll,

1080(1040)mm / 750(710)mm x 50m(Jumbo roll)

Packing: 25mm x 50m / 60rls, 50mm x 50m / 30rls

• PET film (25 μm)

• Silicone adhesive(40 μm)

Polyimide Tape

M17-T-000 (PT-PIT)

Features

- Heat resistance: 250°C
- High Temperature Range
- No Migration /High Tack adhesive

Thickness: 65 μm

Size: 10mm, 20mm, 25mm, 50mm x 33m/roll, 1000mm x 33m(Jumbo roll)

Packing: 25mm x 33m / 100rls, 50mm x 33m / 50rls

• Polyimide film(25 μm)

• Silicone adhesive(40 μm)

Antistatic Polyimide Tape

Polyimide film with thermal resistant silicone adhesive

M13-T-000 (PT-APT)

Features

- Heat resistance: 250°C
- Flame retardant
- Excellent heat, solvent and chemical resistance

Applications

- Masking PCB during wave soldering or solder dip process

Surface Resistance(Back side): 10e5~10e8 ohm

Thickness: 65 μm

Size: 10mm, 20mm, 25mm, 50mm x 33m/roll, 1000mm x 33m(Jumbo roll)

Packing: 25mm x 33m / 60rls, 50mm x 33m / 30rls

• Antistatic treatment

• Polyimide film(25 μm)

• Silicone adhesive(40 μm)

11 Tapes

● Double Side Tapes

Double Side PI Tape

Polyimide film with double side coating with thermal resistant silicone adhesive

Features

- Heat resistance: 250°C
- Excellent heat, solvent and chemical resistance

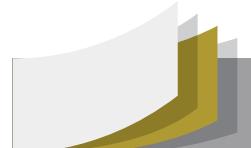

Applications

- Fixing electric parts and components

Thickness: 100 μm

Size: 10mm, 20mm, 25mm x 5 or 10m/roll, 520(490)mm x 5 or 10m(Jumbo roll)

Packing: 25mm x 5 or 10m / 60rls, 50mm x 5 or 10m / 30rls

- PET liner
- Silicone adhesive(40 μm)
- Polyimide film(25 μm)
- Silicone adhesive(35 μm)
- PET liner

108
Tapes

Antistatic Double Side Tape

Antistatic treated PET film with double side acrylic adhesive coating

M16-T-000 (PT-ADT)

Double Side Non-Woven Tape

Non-woven fabric with double side acrylic adhesive coating

M15-T-000 (PT-DNW)

Double Side PET Tape

PET film with double side acrylic adhesive coating

M14-T-000 (PT-DPT)

- Antistatic acrylic adhesive(35 μm)
- Antistatic treatment
- PET film(25 μm)
- Antistatic treatment
- Antistatic acrylic adhesive(35 μm)
- Paper liner(120 μm)
- Size 25, 50mm x 50mm

- Acrylic adhesive(30 μm)
- Non-woven fabric(40 μm)
- Acrylic adhesive(30 μm)
- Paper Liner(120 μm)
- Size 25, 50mm x 50mm

- Acrylic adhesive(20 μm)
- PET film(15 μm)
- Acrylic adhesive(20 μm)
- Paper Liner(120 μm)
- Size 25, 50mm x 50mm

Features

- Bonding jobs in wide range of temperatures and with various foam materials including embossed plastic surface.
- Stable adhesive strength to various materials, like metal, plastics, etc.

11 Tapes

● Aluminum Tape

Aluminum Foil, one face coated with acrylic based adhesive

M25-T-000

Features

- Temperature range: 5~125 degree C.

Applications

- Radiation of heat for home appliances

Color: Silver

Thickness: 60/ μm (AL foil, adhesive) + 130 μm (releasing paper)

Size: 25mm x 50m / 50mm x 50m / 1080mm x 50m (Jumbo roll)

Packing: 25mm x 50m / 40rolls, 50mm x 50m / 20rolls

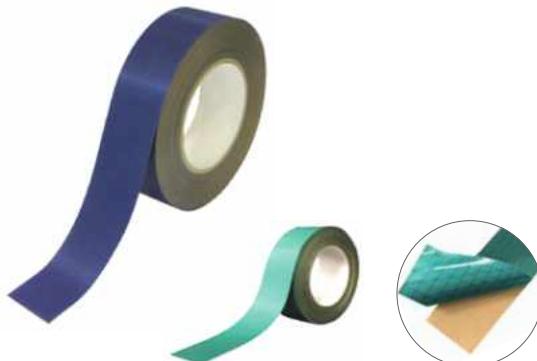

- Aluminum foil(40/ μm)

- Acrylic adhesive(20/ μm)

- Paper liner(130/ μm)

● ESD Fabric Tape

Conductive 5mm grid fabric with acrylic adhesive

M24-T-000

Features

- ESD properties on both sides
- Soft and flexible
- No lint generation
- No residue
- Homogenous structures

Applications

- Cover for the edges of the ESD EVA Mats, Pad and other Mats

Surface Resistance: 10e6~10e8, Back-10e5~10e7 ohm

Thickness: 200/ μm

Adhesive level(gf/25mm): 900(SUS), 1000(PC)

Size: 40mm x 30m, 1000mm x 20, 50, 100m(Jumbo roll)

Packing: 40rolls/carton

- ESD Fabric(5mm grid)

- Acrylic adhesive

- Releasing paper

● Removal Tape

Transparent PET film with low silicone based adhesive tape

M27-T-000

Features

- Very low removal adhesive
- Excellent wetting property
- Easy to remove and residue free after removal

Applications

- Protect the outer frame of LCD TV, Monitor, etc.

Color: Transparent

Thickness: 50 μm +/- 4 μm

Adhesive level(gf/25mm): 30 +/- 10

Holding power(mm/hr): MAX. 0.5

Size: 10mm, 20mm, 25mm, 50mm, etc. x 50m, 960mm x 50m(Jumbo roll)

- PET film(38 μm)

- Silicone adhesive(12 μm)

11 Tapes

● Protection Tape

PET film with AS acrylic adhesive and liner

M30-T-000

Applications

- Protect TSP(front face) in process

Color: Transparent

Surface resistance: 10e9~10e11 ohm

Thickness: 45um

Adhesive level: 5gf/in

Size: 1080(1040)mm x 100 or 200m

- PET(38um)
- AS Acrylic Adhesive(7um)
- White PET Liner(50um)

M31-T-000

Applications

- Protect TSPs(front face) in process

Color: Transparent

Surface resistance: 10e9~10e11 ohm

Thickness: 55um

Adhesive level: 25gf/in

Size: 1080(1040)mm x 100 or 200m

- PET(36um) + Antistatic treatment
- Silicone Adhesive(19um)
- White Fluorosilicone Liner(50um)

M32-T-000

Applications

- Protect TSPs(front face) in process

Color: Transparent

Surface resistance: 10e9~10e11 ohm

Thickness: 70um

Adhesive level: 5gf/in

Size: 1080(1040)mm x 100 or 200m

- PET(50um)
- AS Acrylic Adhesive(20um)
- Transparent PET Liner(50um)

M34-T-000

Applications

- Protect finished Injection products

Color: White

Surface resistance: 10e9~10e11 ohm

Thickness: 45um

Adhesive level: 5gf/in

Size: 1080(1040)mm x 100 or 200m

- PET(38um)
- AS Acrylic Adhesive(7um)
- Transparent PET Liner(75um)

M33-T-000

Applications

- Protect finished TSPs

Color: Transparent

Surface resistance: 10e9~10e11 ohm

Thickness: 165 um

Adhesive level: 3gf/in

Size: 1080(1040)mm x 100 or 200m

- PET(128um)
- Antistatic treatment
- Silicone Adhesive(37um)
- Black PET Liner(75um)

12 Equipment & Tools

● Powerless Eco Ionizer

Can you imagine to neutralize the charged insulator with the ionizer without electric power supply?

All ESD programs should include relative methods for grounding in each work area.

Even though all personnel, worktables and floors are properly grounded, there are still some insulators in the manufacturing sites. So, relevant neutralization for the insulators is essential to maintain the low percentage of errors because insulators are easily charged when they contact other materials even if the other materials are grounded. The charged insulators retain the charges for long periods of time as they can not provide a good pathway for the static charges.

Ionizer is one of the most common and effective equipment to eliminate the charges on insulators in manufacturing areas.

All corona typed ionizers are required electric power and airflow sources to have their own functions. Our Powerless ECO Ionizer, however, is an exception.

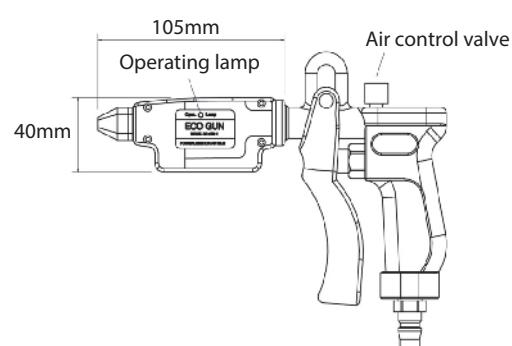

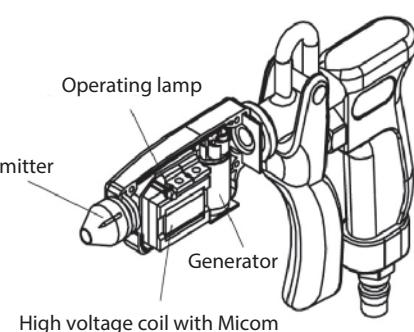

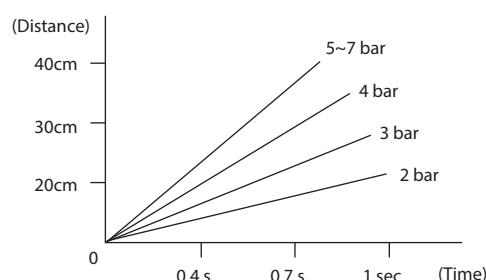

Our high technology based on long experience in this field enables us to develop an innovative Powerless ECO Ionizer, which can be operated without any electric power source.

Operating is just simple. Grip the handy ionizer and trigger the handle, then the air will be distributed in the ionizer, and a special generator mounted in the ionizer will automatically be operated by high pressed air, and it will, then, generate positive and negative ions. When you release the handle, the ionizer will be stopped immediately.

Features

- No need electric power source
- Easy operation
- Easy maintenance
- Excellent performance on neutralization

Category	Descriptions	Remark
Item Code	M39-E-002	
Ion Balance	Within $\pm 10V$	
Ion Mode	AC 14Khz	
Air Pressure	4~7 Bar	
Decay time	0.6 sec.	($\pm 1,000v$ to 100v)
Effective Distance	10cm~50cm	
Life time	3000~5000 hrs	
Weight	200g	

12 Equipment & Tools

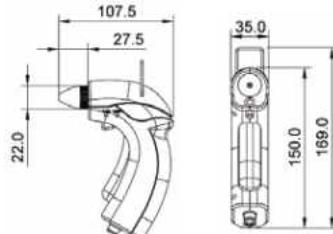

● Ionizing Air Gun

M01-E-009(SIG-30)

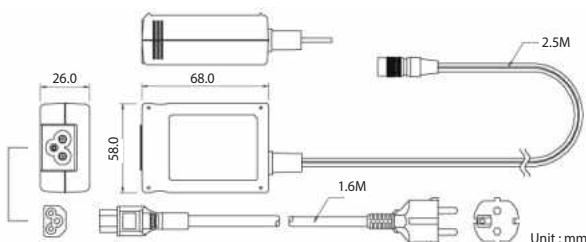

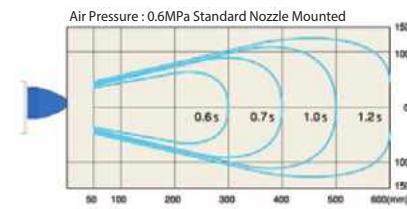

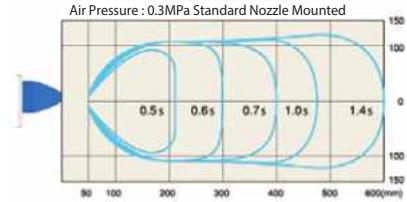

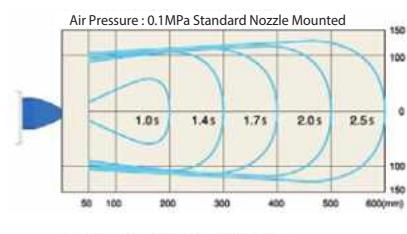

Features

- Ergonomics design
- Particle tracing LED
- Small size & light weight
- Easy connection of tube-fitting (6mm) to select different air settings
- Strongly built cable(150,000 cable bending test)

Specifications

Category	Descriptions		Remark
Model	M01-E-009(SIG-30)		
Input Power	DC 24V		±5%
Power Consumptions	1.8W		Lighting LED
Current Consumption	75mA		DC 24V
Ion-Generation Method	High Frequency AC		
Air purge supply pressure	0.1~0.6MPa (0.4MPa Recommendation)	CDA(Clean Dry Air), N2	
Operation Circumstance	5°C~+40°C (41°F~104°F, 35%~65%RH)		NO dewing
Ozone(O3) Concentration	≤0.05ppm		50mm
Operation Distance	50~mm		Non-hazardous locations
Decay Time	Please refer to Ionizer performance tables		
Ion Balance	Within ±10V	0.3MPa, 150mm	
Main Body Material	ABS		
Hook Material	Stainless Steel		
Electrode Material	Standard Tungsten Option Titanium		
Size	107.5(W) x 150(H) x 35(D)		
Weight	198g		
Alarm Function	H/V Abnormal	Red LED Alarm	
Accessory	AC Adaptor		
Warranty	1 year

• Bench Top Ion Blower(Mini)

Features

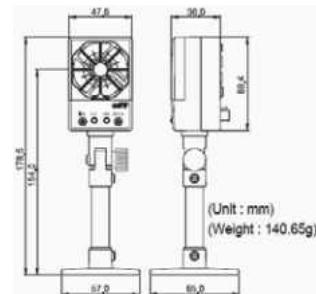

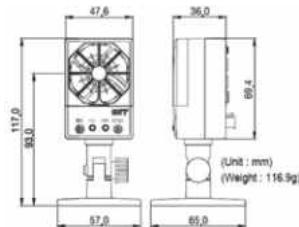

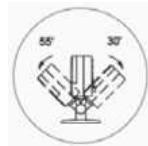

- By using of AC 50kHz high frequency corona discharge method, this ionizer is especially effective in neutralizing static electricity at short-range and in maintaining steadfast balance of plus(+) and minus(-) ions.
- Miniature design allows you to install it in the confined space of equipment for LCD, semiconductor, etc., and this compact ionizer can neutralize static electricity from the objects effectively without using compressed air flow.
- A magnetic attached device enables you to install it at any metallic surfaces easily, and unique brackets allow you to bend the head part vertically, elevate up and down, and rotate the face in any desired directions.
- In case of excess high voltage and the abnormality of fan operating, LED light will be on as "RED"
- Easy maintenance thanks to a removable emitter pin unit.

SKB Series - Air Knife Slim Ion Bar

Features

- Ion Balance: 10~33V(at 10mm~150mm)
- Water Proof (suitable for high humidity area)
- Compact & slim design
- Adjustable input voltage on circumstance
- Alarm for abnormal high voltage
- Electric shock less
- Non-air pressure type
- Operating distance: 10~250mm

SIB3-RD Series

- Ion balance within ±30V (at 100cm distance)
- Pk Voltage control function
- Aerobody design
- Easy maintenance
- Low air consumption
- Tip socket(5ea~59ea)
- RMS(Real Monitoring System)
- Remote control(SIB-RC1) for SIB3-600RD~3200RD
- CE certified(2004)
- S mark certified(2005)

12 Equipment & Tools

SIB7 / SIB7A Series - Mini Ion Bar

Features

- Ion Balance: $\pm 30V$ (in 1000mm)
- Integral Controller type
- Auto Ion Balance(SIB7A)
- Connect Ion Bars each other to power source(Max. 4units)
- One touch nozzle socket
- Operating distance: 50~2,000mm

SIB-ex Series

Features

- Explosion-proof ion bar
- ATEX Certificate for Europe
- KGS Certificate for Korea
- No risk of explosion with low ignition energy
- No firing potential with using flame retardant material
- Operation distance: 50mm~200mm

SSB1 Series

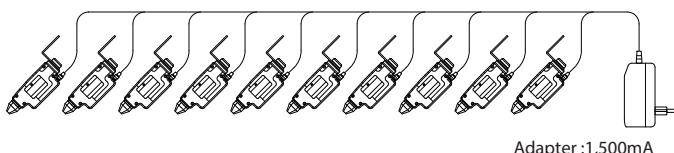

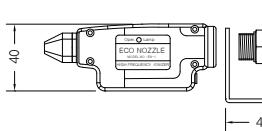

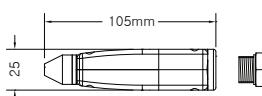

Features

- Can be operated in high temperature environment(Max. 130 °C)
- Small and slim body
- Various lengths are available
- Dedicated tip cleaning device (Option)
- Operation distance: 10mm~250mm
- Ion Balance: $\pm 50V$

● ECO Ion Nozzle

M06-E-039

Features

- High frequency AC
- Anti shock structure
- Use the high purity tungsten discharge needle
- Easy to Install
- Connect maximum 10units of ECO Ion Nozzle to one adaptor

Specifications

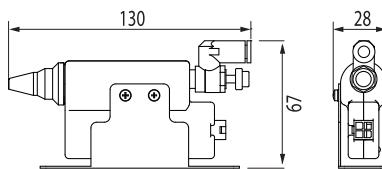

Category	Descriptions	Remark
Item Code	M06-E-039	
Ion Balance	Within ± 30	
Ion Mode	AC 14Khz	
Air Pressure	2~7 Bar	
Decay time	0.6 sec.	($\pm 1,000v$ to 100v)
Effective Distance	10cm~50cm	
Power	DC 12~15V, 150mA, Adapter	
Weight	110g

Scanning Distance	-	1m
Differential Travel	-	20% max. (at rated scanning distance)
Operation Mode	-	Light-ON / Dark-ON selectable by switch
Response Time	-	500ms max. for both operation and recovery
Emiter	-	Infrared LED
Ambient light Immunity	-	Incandescent lamp: 10,000 lux max. Sunlight: 40,000 lux max.
Warranty	1 year	

12 Equipment & Tools

• Ion Chamber

M06-E-040

Our Ion chamber is very convenient to use. When a charged item is put into the Chamber, the ion is automatically created by a infrared sensor.

It is suitable for removing the static electricity on the products in the electronics or general industries. The Ion chamber also has apparatus of dust collecting function by infrared sensor detecting.

Features

- Dust Removal on small parts and products
- Automatically controlled by infrared rays photo sensor
- Operating time setting function
- Air filter (0.3μm)
- Dust pre-filter

When a charged item nears to the infrared sensor, it will remove static electricity & dust at the same time.

Specifications

- Voltage: 220-240V
- Power: 1400W
- Noise Level: ≤75dBA
- Safety Standard: GS/CE/EMC/ROHS
- Cord length: 5M
- Dust capacity: 4.0L
- Color: Black
- Surface Resistance: 10E5~10E6 ohm
- NW/GW(kg): 4.7 / 6.2
- Product dimension: 490 x 320 x 255mm
- GB dimension: 560 x 325 x 290mm

Features

- Light weight and super easy to use.
- Padded shoulder and waist straps stabilize the vacuum on the operator's back and hips and permit long, uninterrupted cleaning.
- Snap on top is reversible to allow hose to be moved to either side for right or left handed operation.
- Four-stage filtration system with sealed-air HEPA filter provides superior clean air exhaust.
- Blower adaptor fits into front of unit, converts vacuum into a blower or inflator.
- With blowing function, has blowing accessories

12 Equipment & Tools

• ESD Vacuum Cleaner

M66-E-004

Specifications

- Measurement (mm): 350*350*565
- Capacity: 35L
- Voltage: 120V-230V/50Hz-60Hz
- Power: 1250W
- Power Cord: 5m
- Hose length: 1.5m
- Plastic Inserting Tube Length: 480mm
- Vacuum level: 18Kpa
- Noise level: 82dBA
- HEPA Filter for Cleanroom
- Surface Resistance: 10E5~10E6 ohm

List of Accessories

1 Handle	12 Blow connection
2 ON/OFF switch	13 Wet brush
3 Top section	14 Sponge Filter
4 Filter basket	15 Short nozzle
5 Safety float valve	16 Pedestal
6 Clasp	17 Clasp seat
7 Container	18 Accessory holder
8 Vacuum hose connection	19 Paper dust bag
9 Rollers	20 Square round brush
10 Flexible vaccum hose	21 Water drain screw
11 Plastic tube	22 HEPA filter

• Nozzle type Vacuum Sealer

Desk top type

Stand type

Features for Vacuum Sealer

- Do not need air compressor for an electric type. You can use it after just connecting electric cord.
- Quiet sound in electric type. It is recommendable for a small office, a store, etc.
- Easy to control thanks to a simple digital controller.
- Good durability and strong for corrosion thanks to Stainless steel case.
- Support various mode such as vacuum, sealing, gas and gas flushing.
- Compact size for easy installation.

12 Equipment & Tools

Features for Digital controller

- Memory function
- Counting function
- Temperature indicator
- Auto nozzle function
- Key lock to prevent malfunction
- Vacuum and temperature sensor for reliable vacuum packing
- Self-diagnosis function.

Physical property

● Chamber type Vacuum Sealer

Single chamber type

Double chamber type

Features for Vacuum Sealer for single chamber

- Table and stand models
- Transparent acrylic cover for packing process check-up (option: stainless steel cover)
- Easy operation thanks to a simple digital controller
- Good durability and strong for corrosion thanks to stainless steel case.

Features for Vacuum Sealer for double chamber

- Higher work capacity with double chambers
- Cover is made of aluminum (option: stainless steel cover)
- Easy operation thanks to a simple digital controller
- Good durability and strong for corrosion thanks to stainless steel case.
- Easy to clean

12 Equipment & Tools

● Automatic Tape Cutter

M14-E-007 (RT-3700)

- Semiautomatic type
(Press button after using all tapes put on disk)
- Only adhesive product can be used
- Long life time
- Automatic cutting and movable sensor

M14-E-005 (RT-7000)

- Fast tape feed and cutting speed.
- Quantity-count function
- Self-diagnosis display
- Emergency alarm
- Build-in Tweezers, Oil, and Separator
- One touch exchangeable knife set
- Automatically apply lubricant to the knife edge.
- Enable to use 2 Rolls at the same time
- Both non-adhesive and adhesive products can be used.
- Preset function (Max 6 different tape lengths)

M14-E-011

Features

- Easy to exchange the knife set
- Enable to use 2 rolls at the same time
- Enable to choose full automatic mode or semi-automatic mode
- Enable to use various adhesive and non-adhesive tapes
- The allowed width is up to 150 mm

M14-E-008 (RT-7700)

- The same function of RT-7000
- Easy to disassemble and maintain
- Programming function

NEW

M14-E-010 (RT-9000)

- The same function of RT-7000
- Easy to tear off the tape as the tape end is folded automatically. (option)

M14-E-006 (RT-8000)

- The same function of RT-7000
- Preset function (Max 12 different tape lengths)
- Programming function

● Laminating machine

Features

- Strong roller system: 6heating rollers + 2cooling rollers
- Strong motor system: Special DC motor for 5,000hours at maximum of ling life
- Maximum 330mm width and 350um thickness is able to laminate
- Can laminate up to 4m per minute
- Actual working time check funtion

Description

MEAS : Measures actial roller temp
 STOP : Stop roller
 REV : Reserve action
 HOT : Initial setting to 100°C, speed 6
 COLD : Cold film lamination
 MEMO : Memory funtion
 SPEED : Variable speed from 1-9

Item Code	M70-E-001	M70-E-002
Max. Laminating Width	330mm(13")	
Max. Laminating Speed	1,400mm/min	4,000mm/min
Max. Pouch Thickness	350MIC(14MIL)	
Max. Laminating Thickness	3mm	
Heating System	Heating roller internal heater	
Q'ty of Roller	6	10
Carrier	Free	
Temperature Control	Yes	
Speed Control	Yes

● ESD LED Magnifier

M69-E-001

Features

- Lens Material : Glass
- Lens Size: 7.5"X6.2"
- Diopter : 3Diopter/5Diopter
- Voltage : 100V/ 110-120V / 220-240V
- Light Source : LED
- Standard Mount: Table Clamp
- Surface Resistance : 10E5 ~10E6 Ohms

Packing Details

- Carton Size : 59x52x30cm
- 4pcs/carton
- Gross(Net) Weight: 20(18)kgs

12 Equipment & Tools

● Air Clean Mat & Water Clean Mat

Are you still using disposable sticky mats?

It is time to think about the environment and being cost-effective at the same time.

We have two types of reusable and eco-friendly Clean Mats that will draw your immediate attention.

The first one is Air Clean Mat, which cleans the bottom of the sole by sucking dust through two step filters. The second one is Water Clean Mat, which washes the bottom of the sole directly with water and moving brushes on the mat.

These Mats are one of the most effective ways to remove dust and contaminants from the sole of the shoes, leaving less wastes and particles. Adopting these remarkable mats will also be a cost saving solution in the long term, even if the initial cost can be higher than sticking to the traditional disposal sticky mat.

Air Clean Mat

M58-E-003

Features

- Detecting sensor
- Air refreshing function
- Easy installation and maintenance
- 2 step filtration(antibacterial and HEPA filters)
- Access Floor type(M58-E-008)
- Heavy traffic(trolley, carts, etc.) type is available
- Air shower room type(M58-E-009)
- Customized sizes are available on request

Item Code	Outer Size(mm)	Mat Size(mm)
M58-E-001	20T x 600 x 1100	500 x 1000
M58-E-002	20T x 600 x 2100	500 x 2000
M58-E-003	20T x 700 x 800	600 x 700

Entrance

Air Shower Room

Water Clean Mat

M57-E-002

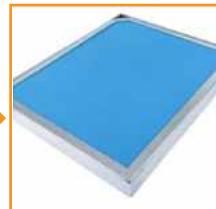

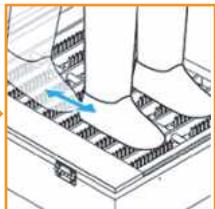

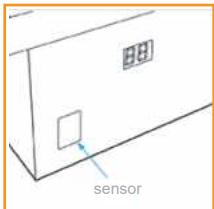

Features

- Detecting sensor
- Cleaning with water
- Easy relocation with wheels
- Special cleaner(diluent) for heavy dirts, oils, etc.(option)

12 Equipment & Tools

How it works

① Step on the mat, then the sensor on the control box will detect motions automatically and the brushes will start moving.

② Move your feet back and forth 3-4 times.

③ Step on the absorption mat to dry the water out of the soles.

• ESD CR Chair Cover

Item Code: M23-E-001
Size: 1.2T x 1,370mm x 40m ±
Color: Navy blue, Black
Surface resistance: < 10e10 ohm

12 Equipment & Tools

• Solvent Dispenser

M32-E-001

M32-E-002

Capacity: 180ml

Surface resistivity: $10^9 \sim 10^{11}$ ohm/sq

Shape: Square and octagonal designs

Materials: HDPE(bottle) + Stainless Steel(Mechanical Pump)

• Antistatic Brush

Fill material	Horse Hair
Trim length	7/16"
Rows	3 x 7
Handlematerial	Plywood
Handlelength	7.75"
Handlewidth	7/16"
Brushface length	1.375"
Brushface width	1/4"

M47-E-001

• Tweezers

Complete lines of precision tweezers for the wide range of microelectronics

13 Handlings & Storages

● Conductive PCB Magazine Rack

Polstar Conductive Magazine Racks are available with several types and sizes to meet customer's needs, and all models are compatible with standard SMT equipment.

Basically, they will be classified with a high temperature type and a normal type by temperature to resist, and a plastic type and a metal type by their materials used.

- ESD Rubber Band

S/R: 10e5 ~ 10e8 ohm
Size : 1.7mmT x 12mm x 120mm(0.5" x 4.75")
Color: Black
Packing: 150-170pcs/bag, kg

- ESD Strap

Black polypropylene hook and loop strap secures JEDEC trays using a D-Ring fastening system. The ESD version is designed with a metal D-Ring to insure a complete static loop. Unlike other "dipped" products that have a limited shelflife, our ESD strap has permanent ESD properties on both sides with ESD logo on the strap.

S/R: 10e9 ohm
Size : 25mm x 508mm
Color: Black
Weight: 22.7g/pc
Packing: 10pc/bag
Constructions: Hook & Loop nylon strap with a metal D-Ring

- ESD Tool Box

S/R: 10e5 ~ 10e6 ohm
Size : 255mm x 125mm x 100mm(H)

PRE I, String Wound Depth Filter Cartridge

PRE I offers a gradual pressure increase during cartridges life versus surface type media that have an abrupt flow cut off when loaded. It provides true depth filtration utilizing hundreds of tapered filtering passages of controlled size and shape.

As the cartridges are wound, each layer of roving is napped to increase filtration capabilities. As a result, each layer of roving contributes to true depth filtration by trapping its share of particles. In addition, irregular blinding is assuring both longer cartridge lifespan and full cartridge utilization.

M01-K-000

Features

- Available in a wide range of materials and micron rating.
- The kinds of media materials are polypropylene, polyester, acryl, cotton, fiber glass, fibrillated polypropylene.
- A broad range of media provides excellent compatibility with the variety of chemicals, organic solvents, animal, petroleum and vegetable oils.
- Advanced develop filter media assure fiber migration control and non-contamination of filtrate.
- Minimized leakage of fiber using inner core cover (applied from 0.5 to 25 micron)
- In cartons, sealed in single poly bags.
- Manufactured according to the rules of ISO 9001 Quality Control system.

PRE II, Non-Woven Depth Filter Cartridge

PRE II is one of the best economical high purity filter cartridges available. Featuring a graded density matrix of all polypropylene fibers, it provides consistent filtration for the wide variety of fluids. Continuous fiber matrix prevents media migration and ensures consistent production yield and overall quality function performance. Fixed pore structure provides efficiency integrity and optimum particle retention. No surfactants or binders are contained, which are to interrupt product quality or cause foaming and thermally bonded non-woven fiber constructions provide superior filtration and often eliminate the need for circulation to achieve product clarity.

M02-K-000

Features

- It is useful for high temperature and high pressure process, as used inner core.
- Normal micron rating and eight removal ratings (0.5, 1, 3, 5, 10, 25, 50, 75, 100 micron).
- In cartons, sealed in single poly bags.
- Manufactured according to the rules of ISO 9001 Quality Control system.

14 Filter & Filter Cartridge

PRE III, Melt-Blown Depth Filter Cartridge

PRE III has strong chemical resistance because of all polypropylene material compositions. Also, randomized 3-dimensional constructions provide high flux and long lifespan.

M03-K-000

Features

- Multi-layer structures : High Dirt Holding Capacity
- FDA complied polypropylene material : Non foaming, No pre-rinsing.
- 100% polypropylene : Useful for the wide range of process fluids.
- High flow-rate & low differential pressure.
- Fixed pore structure provides efficiency integrity and optimum particle retention.
- Normal micron rating and seven removal ratings (0.5, 1, 5, 10, 20, 50, 100 micron).
- In cartons, sealed in single poly bags.
- Manufactured according to the rules of ISO 9001 Quality Control system.

PRE IV, Super Flow Depth Filter Cartridge

PRE IV is designed and developed to serve superior flow. Thanks to high effective filtration area, it reduces initial investment expenses, installation space and maintenance expenses.

M04-K-000

Features

- Six removal ratings
- All polypropylene constructions
- Useful for bulk production process
- No leakage of material
- The complex structure of variant porous non-wovens
- Absolute low difference of pressure
- Long service life
- Manufactured according to the rules of ISO 9001 Quality Control system.

14 Filter & Filter Cartridge

• Semi-Absolute Grade

COMBO I, Wound Semi-Absolute Depth Filter Cartridge

COMBO I was developed for the high viscose liquid industries and the magnetic coating industry. It is the first true absolute depth filter made. Its constructions are unique in that feature a capture mechanism of the main media as polypropylene melt blown sheet, fiber glass sheet and viscous rayon sheet.

Features

- Featuring a graded density matrix of main media, so they provide high contaminant holding capacity.
- Available in a wide range of materials and micron rating.
- Absolute micron rating from 1.4 micron to 9.5 micron and eight micron ratings.
- The kinds of wound media materials are polypropylene, bleached cotton.
- Advanced develop filter media assure fiber migration control and non-contamination of filtrate.
- Minimized leakage of fiber, used inner core cover.
- Manufactured according to the rules of ISO 9001 Quality Control system.

COMBO II, Non-Woven Semi-Absolute Depth Filter Cartridge

COMBO II is one of the best economical high purity filter cartridges available. No surfactants or binders are contained, which are to interrupt product quality or cause foaming and thermally bonded non-woven fiber constructions provide superior filtration and often eliminate the need for circulation to achieve product clarity.

Features

- Featuring a graded density matrix of all polypropylene fibers, they provide consistent filtration for the wide variety of fluids.
- Continuous fiber matrix prevents media migration and ensures consistent production yield and overall quality function performance.
- Fixed pore structure provides efficient integrity and optimum particle retention.
- It is useful for high temperature and high pressure process by using inner core.
- Absolute micron rating and five removal ratings 4.5, 6, 10, 20, 40 micron).
- In cartons, sealed in single poly bags.
- Manufactured according to the rules of ISO 9001 Quality Control system.

14 Filter & Filter Cartridge

CLEAN A, Activated Carbon Depth Filter Cartridge

CLEAN A is the industry standard for specialized industrial and consumer water treatment applications.

Activated carbon has been found to extremely effective in reducing or removing organic chemicals, THM's PCB's and other similar halogenated organic compounds, as well as bad taste and odor.

PT-ATC, activated carbon filter is designed and developed to serve as dual purpose filter for carbon treatment as well as dusts for various fluids and liquids. There are 2 kinds of activated carbon cartridges in PT-ATC. One is a Depth Activated Carbon(D.A.C) and the other is an Activated Carbon Fiber (A.C.F).

PT-ATC can be applied to general housing easily by standard cartridge size.

Features

Depth Activated Carbon (D.A.C)

- Depth carbon's raw material is similar to General Activated Carbon (G.A.C.)
- Finery pulverized carbon powder blended with cellulose.
- Higher density and effective area than G.A.C.
- Higher absorption efficiency than G.A.C.

Activated Carbon Fiber (A.C.F)

- Produced by burning or activating organic fiber
- Vast area of average covering and regular and fine process.
- High speed for absorption and detachment, more than twice compared to granular and sinks.
- Resistance of absorption movement into and out of adsorbents minimized because of small diameters

●PORFLUX I

PORFLUX I pleated filter cartridge filters are designed for application where high flow rate and precise particles removal rating is required. This filters which is designed with 83mm out diameter have two times more filtration area comparison with normal filters. Highly recommended for PDP, LCD, AM-OLED(Active Matrix Organic Light-Emitting Diode), etc.

Features

- Suitable for 6~7 generation LCD
- Suitable for mass particle interception & large capacity processes
- Thermal bonding
- Free of surfactants, binders and adhesives
- Manufactured in clean room environment (class 1,000)

M10-K-000

14 Filter & Filter Cartridge

• PORFLUX II

PORFLUX II pleated filter cartridge filters are designed for application where high flow rate and precise particles removal rating is required. This filters which is designed with 131mm out diameter have five times more filtration area comparison with normal filters. Highly recommended for generation from 7 to 8 of PDP, LCD, AM-OLED (Active Matrix Organic Light-Emitting Diode), etc.

Features

- Suitable for 7~8 generation LCD
- Large filtration surface area
- High flow rate and efficiency
- Low maintenance cost
- Manufactured in clean room environment (class 1,000)

M11-K-000

• PORFLUX III

PORFLUX III pleated filter cartridge filters are designed for application where high flow rate and precise particles removal rating is required. This filters which is designed with 152mm out diameter have ten times more filtration area comparison with normal filters.

Highly recommended for not only generation from 10 to 11 of PDP, LCD, AM-OLED(Active Matrix Organic Light-Emitting Diode) but also sea water desalination, pre-filtration of RO system and power generation, etc.

Features

- Suitable for 10~11 generation LCD
- Ultra capacity
- Very long service time
- Fewer change-out
- Suitable for high pressure application

M12-K-000

• PORFLUX IV

PORFLUX IV The High-Flow PORFLUX IV Filters are designed for bulk N2 and CDA application in the TFE-LCD, OLED and Semiconductor industries.

Features

- Suitable for TFT-LCD, OLED, Semiconductor
- Ultra capacity
- Very long service time
- High flow rate vs. differential pressure

M13-K-000

14 Filter & Filter Cartridge

• PORPRO I

PORPRO I cartridges are made of 100% pure polypropylene, polyethylene and nylon depth matrix that offers nominal retention grade. This filters with multi graded fiber that yields progressive finer particles retention through the depth and life of media.

This filters are available in a range of formats, pore sizes, lengths

Features

- High particle retention
- High flow rates and superior throughputs
- Good chemical compatibility
- All materials are FDA listed for meeting with food and beverages
- Thermal bonding

M14-K-000

• PORPRO II

PORPRO II cartridges are pleated, depth all polypropylene with multi-layers media. This filters are ideally suited for the removal of agglomerated particles and gels from slurries used in the chemical mechanical polishing (CMP) of oxide, tungsten and copper. This is accumulated by technical know-how for high flow rate and efficiency filtration.

Features

- Superior high flow rate
- Good removal capability of gel and viscous liquids
- Free of surfactants, binders and adhesives
- All materials meet FDA listed for food and beverages
- Thermal bonding

M15-K-000

• PORPRO III

PORPRO III cartridges are made of 100% pure polypropylene depth matrix that offers absolute retention grade. This filters with multi graded fiber that yields progressive finer particles retention through the depth and life of media. This filters are available in a range of formats, pore sizes, lengths and connections to suit your individual application.

Features

- Absolute filtration
- Good chemical compatibility
- Melt-blown polypropylene media protects against shedding and particle unloading
- Thermal bonding
- All materials meet FDA listed for food and beverages
- Manufactured in clean room environment (class 1,000)
- Manufactured by ISO 9001 quality control system

M16-K-000

• PORLAS

PORLAS cartridges are pleated with absolute grade of fiber glass. This is designed to provide efficient particles removal in both liquids and gases system. The use of glass fiber media as a vent filter can be used in applications where a sterile environment must be maintained but an exchange of gases is critical such as bioreactors, isolation or environmental chambers and fermentation tanks, etc.

Features

- Excellent chemical compatibility and thermal resistance
- Superior efficiency
- High dirt holding capacity
- Long service time
- High flow rate

M17-K-000

• PORMIN

PORMIN cartridges are constructed with a proprietary polypropylene , PES, PTFE and micro fiber depth. These filters offer flow rates and contaminant holding capabilities superior to those of other all competitor filters use in general industrial and micro electronic. PORMIN cartridges are suitable for small flow rate applications.

Features

- High particle retention
- High flow rates and superior throughputs
- Good chemical compatibility
- Thermal bonding
- Manufactured in clean room environment
- Manufactured by ISO 9001 and ISO 14001 quality control system

M18-K-000

• PORNON

PORNON cartridges are made of high purity grade of nylon membranes for use in final filtration where high purity and efficient particles removal is needed. The intrinsically hydrophilic nature of nylon membranes result in easy wetting across the membrane. Hydrophilic nylon membrane and pure polypropylene construction provides excellent chemical compatibility and suitable for wide range of applications.

Features

- Highly hydrophilic property
- Suitable for water cleaning process
- No pre-wetting
- Good chemical compatibility
- Long life time
- Low extractable

M19-K-000

14 Filter & Filter Cartridge

• PORPES

PORPES cartridges are made of casted sulfonated PES(Polyethersulfone) polymers. This is designed for final filtration where absolute retention is required or final filtration to remove extremely fine particles. Inherently hydrophilic and the high asymmetrical xed pore structure of PES membrane offers absolute filtration such as food & beverage, micro-electronic, bio-technology and pharmaceutical, etc.

Features

- Highly asymmetric pore structure
- Suitable for water treatment process
- Inherently hydrophilic, good chemical compatibility
- Manufactured by ISO 9001 quality control system
- All polypropylene components meet the specifications for biologicalsafety as per the USP for Class VI-121 °C PLASTICS (Gaskets/O-mg exluded)

M20-K-000

• PORTEF

PORTEF cartridges are made of ePTFE(expanded Polytetrafluoroethylene) membrane. This filters can be two kinds of products such as hydrophobic or hydrophilic one. Hydrophobic PTFE membrane is very useful for air filtration and venting process. Hydrophilic one should be made from chemical surface treatment or alcohol pre-treatment. Make it the ideal choices for broad range of liquid and bulk air filtrations.

Features

- Excellent chemical compatibility and heat-resisting property
- Suitable for gas filtration, ventilation and liquid filtration
- Hydrophobic and hydrophilic
- High particle removal efficiency
- Low extractable

M21-K-000

• PROCAP

PROCAP are suitable for a wide range of chemicals and solvents industrial as well. PROCAP can be used for the removal of toxic and harmful material. PROCAP assembly is a compact capsule, ideally suited for the filtration of point-of-use CMP slurry.

Features

- Minimized dead space for complete and easy venting
- High flow rates and superior throughputs
- Good chemical compatibility
- Manufactured in clean room environment
- Manufactured by ISO 9001 and 14001 quality control system

M22-K-000

15 Wire Shelves and Utility Carts

• Wire Shelves

Pole

- Chrome plated steel pole
- 25.4mm dia. X 1.2mm(T)
- 9 different lengths(450mm~2200mm)

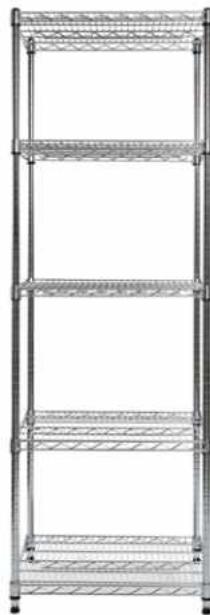

Wire Shelf

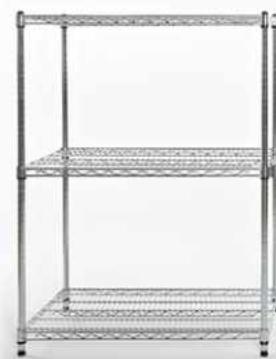

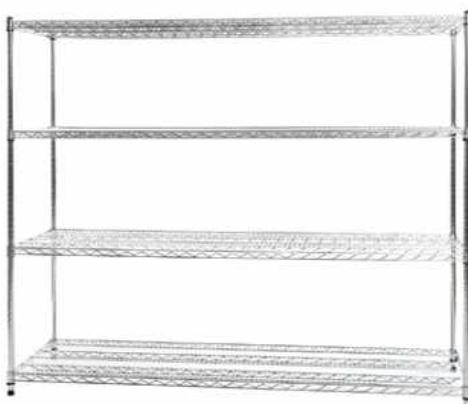

- Chrome plated steel wire
- Wire - 6mm, 3.5mm, 4.5mm
- Load capacity - 250kgs/shelf

* Stainless steel(SUS 304) material is also available on request

Conductive PP Compound

Conductive thermoplastic compound based on polypropylene polymer and conductive carbon black

Reinforced PP Compound

Thermoplastic compound based on polypropylene polymer and special fillers. Pigment master batche that is suitable for PP can be used to add color, but the effect on other properties should be confirmed by trial and error.

ESD PP Compound

Permanent ESD polypropylene thermoplastic compound

Available in natural color.

Features

- ①Excellent conductivity
- ②Various color available
- ③White compound
- ④Smooth surface
- ⑤Easy processing
- ⑥Good stiffness
- ⑦High impact
- ⑧High flow

Applications

- ①Sheet
- ②Injection molding
- ③High strength PP sheet for injection molding
- ④Corrugated sheet
- ⑤General purpose
- ⑥Antistatic PP case

17 Compound & Sheet

• ESD Compound with new technologies

The conductive networks were formed by mutually connecting the conductive filler through the method of point or line contacts. However, as the contact area of the connection part is extremely small, especially if the matrix contracted or were acted upon by tensile strength, the conductive network would be cut off. It means that either conductivity could not be materialized or it would be markedly lowered.

In order to resolve the limitation and the problems of existing technologies, we achieved stable conductivity by three dimensional connecting the conductive fillers to the matrix through the ESD additives added. In addition, we realized incidental effects that enhanced mechanical properties, including the strength and the internal abrasion of the materials.

SEBS(Styrene Ethylene Butadiene Styrene) Compound

*SEBS + ESD additives + CNT(Conductive Nano Tube)

TPU(Thermoplastic PolyUrethane) Compound

*TPU + ESD additives + CNT(Conductive Nano Tube)

Features

- Stable dispersion of CNTs for the prevention of ESD
- Control of surface resistivity to meet ESD requirement
- Able to adjust hardness while satisfying ESD prevention requirement
- Maintaining stable surface resistivity against contraction or additional tensile strength to the compound

Applications

- Packing materials
- ESD hose
- Stylus pen tip
- Electric cables
- ESD housing
- ESD mats
- ESD finger cot
- ESD film
- Carrier rollers

TPU Series						

M08-V-000

Conductive PET sheet does not contain carbon, metal and any corrosive agents. It is very clean and can be used in Cleanroom and rewashed in either ultrasonic DI water or IPA without any degradation or contamination.

- Features
 - Not affected by humidity
 - No particle generation
 - Good durability without any degradation
 - Recyclable
- Applications
 - Thermoforming trays
 - Hard disk containers
 - Medical device packaging

Color: Clear
S/R: 10e5~10e6 ohm
Thickness: 0.5mm, 0.65mm, 0.9mm, 1.2mm
Width: 610mm, 640mm, 720mm, 1,300mm

18 Groundings

• Wrist Strap

Worksurfaces and personnel should be grounded by the proper using of Wrist Straps, ESD Shoes, Heel Grounders, ESD Clothing, etc. Polstar Wrist Straps provide the most reliable and economical pathway of ESD built up on human body to ground. Ground Cords and Coil Cords are also the major parts of safe workstation.

- Snap Dia & Type & Length can be adjustable.

• Dual Bench Mount

Cord length: 4.5m
Wrist strap grounding for 2 persons
Connecting with plug or snap button

• Wrist Strap Monitor

Features

- Instant warning of wrist strap failure.
- Easy and convenient to operate
- Compact and handy
- Compatible with any wrist straps with banana plug in the market.

Specifications

- Input AC 220V / 60Hz (DC 6V)
- Material: Polystyrene
- Dimension: 67mm X 60mm X 29mm
- Weight: 60gm (not including power supply adaptor)

• Wrist Strap Tester

LED Display Indicator

- GOOD(Green): 800KΩ ~ 10MΩ
- HI(Yellow): 10MΩ above
- LO(Red): 800KΩ below

Specifications

- Test voltage: Regulated 9 volts, DC
- Operating Voltage: 6.5~9 volts
- Accuracy: +/- 5%
- Weight: 145g
- Dimensions: 28mm(T) x 71mm(W) x 90mm(L)

18 Groundings

• Heel Grounder

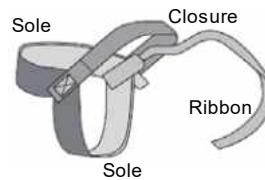

Color: Black/White

Ribbon: 18"/30" long nylon/polyester tab with 8 conductive strands
Cross-Linked tire grade rubberstrands
1 Mohm resistor

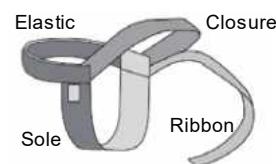

Type D

- Two soles for double life span

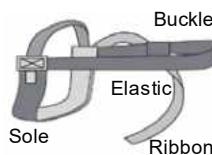

Type S

- One sole and an elastic back strap

• Toe Grounder

Color: Black/White

Ribbon: 12" long nylon/polyester grounding tab with 8 conductive strands
Connecting with plug or snap button
1 Mohm resistor

Toe grounder with a snap-lock fastening system is designed for using with the variety of shoes, including high heels, cowboy boots, flats shoes, loafers and safety shoes.

• Sole Grounder

Color: Black/White

Ribbon: 12" long nylon/polyester grounding tab with 8 conductive strands
Connecting with plug or snap button
1 Mohm resistor

Sole grounder is equipped with an elastic D-ring fastening system, which provides the snug cinching of ankle strap and allows "flex" during walking. They combine the features of heel and toe grounders and are designed to use most types of shoes and boots.

Closure Styles

Hook & Loop

It provides a comfortable and secure fit

Hook & Elastic Loop

It is easy to be adjusted to fit the individual wearer

D-Ring

It allows "flex" during walking

Quick Buckle

It provides a quick release

• Face Mask

Clean Face Mask

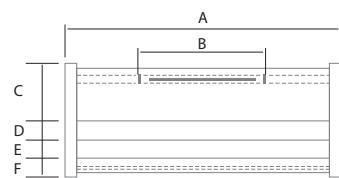

M01-D-001

3 ply non-woven meltblown PP filter
Size: 90mm x 180mm
Ear Loop: 190 mm
Bacteria Filtration Efficiency (BFE): Min. 99%
Pressure Differential (Delta-P): Max. 1.6mm/Aq.
Particles (>0.3 microns): Less than 50 ea (Dry Flex test)
Packing: 50 pcs/bag

CleanRoom Face Mask

M01-D-009

Basic Information

- Size: 90mm x 180mm, 90mm x 210mm, 90mm x 230mm, 3 layers
- Packing: 50pcs/Bag, 30Bags/Box

Materials

- Out layer: HDPE Film(1st filtration)
- Middle layer: Polypropylene Filter(2nd filtration)
- In layer: PET/PP mixed non-woven
- Ear Band: TPU

Product Specifications

(90mm x 230mm)

	A	B	C	D	E	F	Tolerance
Length(mm)	230	95	35	17	15	23	+/- 5%
	Measure				Standard	C	
APC	ea/g, 0.1um, 1CFM				Max. 120		
Dimensional Stability	%				Max.5		

Features

- Adopting unique designs
 - Using HDPE film in out layer
 - Using TPU ear bands
 - Making bigger size(9cm x 23cm, 9cm x 21cm)
 - Attaching ear bands onto the front side of the Mask
- Using best fit materials required by each part to achieve comfortability, good air permeability and filtration.
- All materials used have been passed a skin trouble test with the mark of "Negligible".
- By using Polypropylene filter, which has high efficient filtering performance with good air permeability, as a middle layer, our CleanRoom Face Mask provides excellent comfortability to users.

Cleanroom Active Carbon Face Mask

M07-D-001

4 ply non-woven meltblown PP and active carbon filter for smell filtering
Size: 90mm x 180mm
Ear Loop: 190mm
Bacteria Filtration Efficiency (BFE): Min. 99%
Pressure Differential (Delta-P): Max. 1.6mm/Aq.
Particles (>0.3 microns): Less than 50 ea (Dry Flex test)
Packing: 50 pcs/bag

● Cone Type Respirator

Our Cone Type Respirators are specially designed to protect workers working in various industrial fields. There are several different grades in our range. Basically, all grades of our Respirators consist of 4 layer constructions, such as surface non-woven, outer filter, electrostatic charged filter and inner filter with white and grey colors, but some types are reinforced with special layer, material, treatment, attachment, etc. for maximum efficiency in certain areas or circumstances.

CE

M06-D-006 (C250)

Features

- CE Certified
- Applied the two step process to protect filter, better efficiency, low resistance and long lifetime
- Changing a material, remove fuzzy and smell, light weight and good elasticity
- No deformation of mask form/Better wearing, comfort and airtightness

Applications

- Dust, Mist

Packing information

240 pcs/case(20pcs/box, 12 boxes/case)

19 Disposable

CE

M06-D-007 (C270V)

Features

- CE Certified
- Equipped with a new exhalation valve one-body type valve, no break, no leakage
- Low inhalation resistance, Light weight

Applications

- Dust, Mist

Packing information
240 pcs/case(10pcs/box, 24 boxes/case)

CE

M06-D-008 (C280V)

Features

- CE Certified
- Face contact seal: Equipped
- Exhalation valve: Equipped
- The best performance and functionality as P1 class product (Efficien 96~99%, Resistance 80~100pa/95L)

Applications

- Dust, Mist

Packing information
240 pcs/case(10pcs/box, 24 boxes/case)

173

Disposable

CE

M06-D-009 (C350)

Features

- Apply the high efficient fabric to all 300 series -> Good for deodorization
- Excellent resistance of in-exhalation
- Carbon power never drop

Applications

- Dust, Mist, Smell

Packing information
240 pcs/case(20pcs/box, 12 boxes/case)

CE

M06-D-010 (C450V)

Features

- CE Certified.
- Equipped with a exhalation valve
- Apply the super electrostatic filter on 400 series mask, Excellent resistance of inexhalation & efficiency
- New exhalation valve makes you to breath easily, light weight and give you a clear view
- No leakage as all-in-one attachment method
 - Structure: 3 layers(Surface felt, Super electrostatic filter, Inner filter)

Applications

- Dust, Mist, Fume

Packing information
240 pcs/case(10pcs/box, 24 boxes/case)

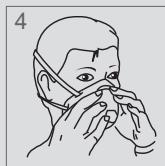

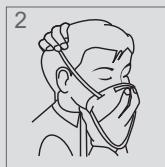

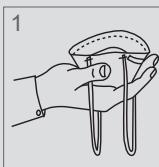

19 Disposable

Fitting Instructions

Fixed Type

Band Hook Type A

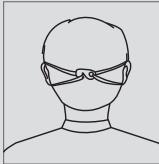

1. Cup the mask in your hand with the nose clip at your finger tips, allowing the head string to hang freely below your hand position the mask under your chin with the nose clip

2. Pull the top string over your head resting it high at the top back of your head.

3. Pull the bottom string over your head and position it around the neck below the ears

4. Place your fingertips from both hands at the top of the nose clip. Using two hands, mold the nose area to the shape of your nose by pushing inward while moving your fingertips down both slides of the nose clip. Check the fit, place both hands completely over the mask and exhale. If air leaks around mask edges, readjust the nose clip and mask edges to be fit face properly.

Band Hook Type B

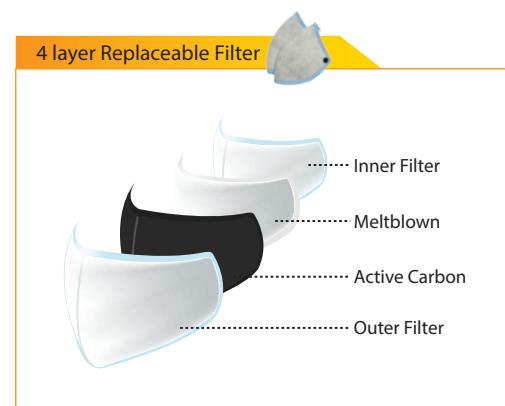

Hook the left side string and right side string, and strain the strings to be fitted

• Dust Mask

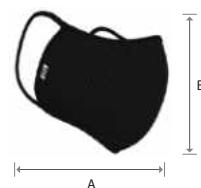

M12-D-001

Features

- Reusable after cleaning
- Using double resell mesh polyester material that passed 200 cycle durability test
- Adopt functional filter
- 4 layer replaceable superlative filter(PM 2.5um, 97% efficiency)
- Super wearability
- 3D mapped fit design
- Double wire support
- Optimal air entry by using high-quality mesh
- Extra helping pad for nose clips
- Latex free spandex ear loop
- UV protection
- KS certified material blocks over 90% of UV rays

• Heat Protection Series

• Heat Resistant Gear

Kevlar + Carbon Series

Material: Kevlar + Carbon fiber

Features

- Heat resistance to 400°C
- Helps welding operation with excellent wearability and flexibility
- Excellent cut resistance
- Widely used for welding purpose in replacement of leather protective equipment
- Can be custom-made to suit customer's requirements

Heracron + Nomex Series

Material: Aramid / Heracron + Nomex

Features

- Heat resistance to 200°C
- Excellent heat resistance and tensile strength
- Can be custom-made to suit customer's requirement

• Flash Protection Guard

Material: Aluminized aramid heat resistant fabric

Features

- Withstand radiant temperatures up to 800°C
- Superior protection from extreme temperature
- KCs(Korea Certificate Safety)
- Can be custom-made to suit customer's requirements

20 PPE

• Safety Helmets

M02-Q-001

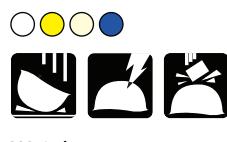

Weight: 365g
Material: ABS
Class: ABE

Features

- Comfortable & light Weight
- RBS* provides excellent impact absorption
- Adjustable with 6 point suspension system
- Auto-release chin strap
- Low nape head band with ratchet suspension
- Slot for ear plugs and face protector

M02-Q-003

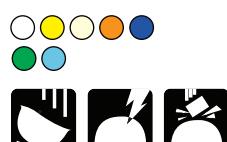

Weight: 405g
Material: ABS
Class: ABE

Features

- Recommend for supervisor level
- RBS provides excellent impact absorption
- Adjustable with 6 point suspension system
- Auto-release chin strap
- Low nape head band with ratchet suspension

M02-Q-004

Weight: 390g
Material: ABS
Class: ABE

Features

- Good upper peripheral vision
- RBS provides excellent impact absorption
- Adjustable with 6 point suspension system
- Auto-release chin strap
- Low nape head band with ratchet suspension

• Cleanroom Safety Helmet

M07-Q-001

• Bump Cap

M03-Q-001

Material: ABS/Polypropylene

Features

- The helmet and the bump cap are developed to meet needs for light work and cleanroom environment.

Safe Helmet Class

A Grades : prevent the falling object

AB Grades : Prevent the falling object, falling

AE Grades : Prevent the falling object, electric shock under 7000V

ABE Grades : Prevent the falling object, falling, electric shock

* RBS : Rail Brake Suspension System

20 PPE

• Safety Glasses

M04-Q-003

Lense: Clear Lenses
 Material: Frame-PC / Lense-PC
 Weight: 34.4g
 Size(mm): 154.8(W) x 158(H) x 55.5(D)

Features

- Excellent impact resistance of PC lenses and frame
- Block 99.9% of UV rays
- Wide view by adopting big lenses
- Good wearability

• Safety Goggles

M08-Q-001

Lense: Clear Lenses
 Material: Frame-PVC / Lense-Acetate
 Weight: 66.8g
 Size(mm): 68(L) x 149(H) x 0.8(T)

Features

- 4 ventilation holes
- Excellent antifog property
- Light weight frame
- Good wearability
- Easy replacement of the lenses (sold separately)
- Good resistance of heat and chemicals
- No particle is stuck on the lenses by anti-static function

• Cleanroom Safety Goggles

M01-Q-001

Lense: Clear Lenses
 Material: Frame-Silicon/ Lense-PC
 Weight: 91.2g

Features

- Can be used in Cleanroom
- Autoclavable
- Excellent antifog property
- One-touch soft and wide detachable band
- Good wearability
- Good resistance of heat and chemicals
- Anti-static function, no particles and no allergy

M01-Q-002

Materials
 Frame: Santoprene™ thermoplastic rubber(gray)
 Lense: Polycarbonate(clear)
 Head band: Silicone(clear)

Application: Aseptic processing (sterile environments) or ISO 5
 Size(mm): 19 x 9 x 8 cm (l x b x h)
 Weight: 108g

Features

- Soft frame material
- Innovative panorama lens for superb all-around vision
- Rotatable hinges allow for broad adjustability
- Fully autoclavable at 121° / 134° C (reusable)
- Robust silicon headband (lint and latex free)
- Special ventilation concept prevents fogging of the lens
- Complies with GMP, ISO, VDA and FDA regulations
